Canadian Northern Railway: Grandview to Edmonton.

DEPT. OF JUSTICE, OTTAWA, November 11, 1903.

SIR,—I have the honour to acknowledge receipt of your letter of the 31st ultimo, in reply to mine of the 30th, with respect to a question which has been raised by the Department of Railways and Canals as to the proper mode of dealing with moneys paid into the bank under clause 42 of the mortgage of July 29, 1903, from the Canadian Northern Railway Company to the British Empire Trust Company, Limited, and the National Trust Company, and to which His Majesty represented by the Minister of Finance and Receiver General is a party.

The question submitted by the Department of Railways and Canals is in effect whether such moneys may be paid by a cheque of the Finance Department, on authorization in each case from the Governor in Council, without reference to the Auditor General. As this question is one in which your department is concerned, and as it seemed to involve considerations of financial practice, it was thought desirable to obtain your views before sending an answer to the letter of the Department of Railways and Canals.

In your reply you state as follows:

'I am requested by the Minister of Finance to say that he has no view of the matter in question which he deems it necessary to press. The essence of the arrangement with the Canadian Northern Company is that the money to be raised under the guarantee shall be applied to the construction of the work in respect of which the guarantee is given. The officials of the Department of Railways and Canals will no doubt inquire into the work done, and certify what sums may from time to time properly be drawn out of the fund in question.

'Whether the moneys in the fund are to be regarded as in a sense public moneys to be accounted for as such under the Audit Act, or whether they are to be regarded as funds of the company, and not subject to the conditions of the Audit Act, is a question upon which it is desirable that your Department should advise. We understand that Mr. Lash, the solicitor of the company, takes the latter view, and he has probably presented this view to your department, and you will be able to give it whatever consideration you deem it worth.

'So far as this department is concerned it will be content to follow the course which your department advises as the proper one to be followed under the terms of the statutes and documents relating to the guarantee.

'Though no stock has yet been issued under the mortgage, the Canadian Bank of Commerce has advised us that it holds under the mortgage the sum of $2,179,999.98, being, as I understand, advances made in anticipation of the issue of the stock.

'I inclose a copy of the formal acknowledgement, dated 8th instant, sent this department by the bank. No action has yet been taken to put the amounts through our books, and before doing so, I shall be glad to be advised as to whether the amounts in question are to be carried into our accounts in the ordinary way, and to be repaid by our cheque, or whether they are to be considered as amounts held by the bank to be paid on instructions of the Minister of Finance after authorization by the Governor in Council.'

The acknowledgement received from the bank is dated October 8, and is signed by the general manager, and acknowledges having received from the railway company and having placed to the credit of the Minister of Finance and Receiver General as required by clause 42 of the mortgage, three several amounts, making in all the sum mentioned in your letter, and that the bank holds the said amounts and any interest which may be credited with respect thereto for the purposes and upon the terms set out in clause 42 of the mortgage.

I now beg to state that Mr. Lash, the solicitor of the company, has recently submitted his view of the question raised by the Department of Railways and Canals to

this department. Mr. Lash's argument has been carefully considered, but I am not prepared to hold that these moneys are not public moneys within the meaning of the Consolidated Revenue and Audit Act. They do not 'belong to Canada' in the sense of section 2, paragraph (*a*) of the Act, but they are, I am inclined to think, within the meaning of that paragraph collected in trust for the purposes of the mortgage, and in this view they are subject to such of the provisions of the Act as apply to other public moneys of the same kind, *i.e.*, trust moneys within paragraph (*a*). It is true that section 42 of the contract provides that pending completion and equipment of the work the balance at the credit of the special account shall, until paid out as provided by that clause, be deemed part of the mortgaged premises, and that these moneys, therefore, are the property of the company as *cestui qui trust* subject to the mortgages to the trustees for the bondholders, but they are nevertheless in the meantime held by the government and subject to its order in trust for the purposes set forth in clause 42, and otherwise in the mortgage; moreover under the statute the government itself has or may have a beneficial interest in the moneys deposited to the special account because it is to stand in the rights of the security holders as to all moneys paid by the government in discharge of its guarantee. I am to state further that as at present advised, I do not see any reason in principle apart from the literal construction of the statute, why these moneys should be exempt from ordinary course of government audit. While, however, the moneys are subject to such provisions of the Consolidated Revenue and Audit Act as are applicable, I do not think sections 29 to 33, inclusive, applicable, as these relates to votes of money or parliamentary appropriations, and the moneys in question do not belong to these. It would be competent, I think, to apply section 50, if the Minister of Finance or Treasury Board think it expedient to do so, and my attention has not been called to any other section imposing duties upon the Auditor General with regard to the matter.

With regard to the point mentioned in the last paragraph above quoted from your letter, the moneys paid into the bank under the mortgage are to be in a special account to the credit of the Receiver General, and should be carried into your accounts accordingly and paid out by the cheque of the department, as other moneys of a like nature.

I am, sir, your obedient servant,

The Deputy Minister of Finance. E. L. NEWCOMBE, *D.M.J.*

AUDIT OFFICE, OTTAWA, December 9, 1903.

SIR,—With reference to the Order in Council of November 5 last regarding the inspection of the Canadian Northern Railway from Grand View westward and your report, I beg to say that I have not seen your report which you were good enough to say when I saw you last that you would have forwarded to this office without delay.

I have not noticed in the papers which have reached me, what is the face value of the stock which was sold and which yielded in the one case $2,179,999.98 and in the other $483,333.33. I should be glad to get that information.

I am, sir, your obedient servant,

The Deputy Minister, Railways and Canals. J. L. McDOUGALL, *A.G.*

RAILWAYS AND CANALS DEPT., OTTAWA, Dec. 11, 1903.

SIR,—I have the honour to acknowledge the receipt of your communication of the 9th instant, referring to the Order in Council of November 5 ultimo, authorizing payment of the sum of $1,450,000, in respect of the section of the Canadian Northern Railway from Grand View westward, as to which you desire certain information.

In reply, I have to say that whatever action has been taken on the said order, none has been taken by this department, which is not concerned as to the manner in which such authorization is carried out.

I am, sir, your obedient servant,

The Auditor General. COLLINGWOOD SCHREIBER, *D.M., R. & C.*

AUDIT OFFICE, OTTAWA, Dec. 14, 1903.

SIR,—I have your letter of the 11th, in reply to mine of the 9th instant, regarding the Canadian Northern Railway guarantee. You have overlooked the first part of my letter with regard to the inspection of the railway. Will you be kind enough to send me a copy of your report.

I am, sir, your obedient servant,

The Deputy Minister, Railways and Canals. J. L. McDOUGALL, *A.G.*

AUDIT OFFICE, OTTAWA, Dec. 14, 1903.

SIR,—I have received certain entry warrants dated November 16 and 20, with reference to deposits in the Canadian Bank of Commerce and withdrawals therefrom on account of the Canadian Northern Railway, as affected by the Guarantee Act of last session.

It appears to me, without information to the contrary, that the Canadian Bank of Commerce must have paid out the $1,450,000 on its view of the effect of the 42nd section of the Trust Mortgage. I wrote to the Deputy Minister of Railways, on account of the nature of the reference to him as Chief Engineer of the Department of Railways and Canals in that 42nd section, in the following words:—

'I have not noticed in the papers which have reached me what is the face value of the stock which was sold and which yielded in one case $2,179,999.98, and in the other $483,333.33. I should be glad to get the information.' Mr. Schreiber's answer is to the effect that 'whatever action has been taken on the said Order (the Order in Council of November 5) none has been taken by the Department of Railways and Canals, which is not concerned as to the manner in which such authorization is carried out.'

I have heard accidentally that the stock secured sold at a discount. If so, with the limited information which I have as yet been able to acquire, it appears to me that, on the Order in Council of November 5, too large an amount has been paid over to the company. I am assuming, on the opinion of the Department of Justice with reference to the duty of this office in connection with this subject, that this is a matter for which I have some responsibility, and, therefore, I should be very glad to get any information from you in connection with it. Should not the government give directions to the Bank of Commerce? Perhaps you will supplement my opinions in connection with this matter by anything on the subject which may appear to you to be of advantage to me.

I am, sir, your obedient servant,

The Deputy Minister of Finance. J. L. McDOUGALL, *A.G.*

FINANCE DEPT., OTTAWA, December 15, 1903.

SIR,—I have the honour to acknowledge the receipt of your letter of the 14th inst., in *re* deposits in the Canadian Bank of Commerce on account of Canadian Northern Railway.

I shall be glad if you will kindly let me have a copy of the opinion of the Department of Justice referred to in your letter, and a copy of any correspondence in connection therewith.

I am, sir, your obedient servant,

The Auditor General. J. M. COURTNEY, *D.M.F.*

AUDIT OFFICE, OTTAWA, December 16, 1903.

SIR,—I have the honour to acknowledge the receipt of your letter of the 15th instant in reply to mine regarding the deposits in the Canadian Bank of Commerce on account of the Canadian Northern Railway.

The opinion to which I referred was given in a letter of the Deputy Minister of Justice dated the 11th ulto., and addressed to yourself.

I am, sir, your obedient servant,

The Deputy Minister of Finance. J. L. McDOUGALL, *A.G.*

RAILWAYS AND CANALS DEPT., OTTAWA, December 19, 1903.

SIR,—I have the honour to acknowledge the receipt of your communication of the 14th instant, with further reference to the Order in Council of November 5 ultimo., authorizing payment of the sum of $1,450,000 in respect of the section of the Canadian Northern Railway from Grand View westward, in which you draw my attention to the request contained in your letter of the 9th instant for a copy of my report as Chief Engineer, on the results of the inspection of the section of the railway in question.

In reply, I have to say that your request was not overlooked, but that, as the department has nothing to do with making application for payment under the guarantee agreement entered into with the company, the information to that effect, conveyed in my letter, appeared to cover the ground sufficiently. I may add that, as I am sure you will understand, no discourtesy to you was then intended, or is in any way implied in my present communication.

I am, sir, your obedient servant,

The Auditor General. COLLINGWOOD SCHREIBER, *D.M.R. & C.*

AUDIT OFFICE, OTTAWA, December 23, 1903.

SIR,—I beg to acknowledge the receipt of your letter of the 19th instant with reference to your report of the inspection of the completed part of the Canadian Northern Railway.

So far as I can see the report is as necessary in this case for the thorough understanding of and dealing with the transaction between the government and the Canadian Northern Railway, now in progress, as in the case of a payment to a railway company for work done. If the work done had been only 15 per cent or 10 per cent, the money which would have gone to the company would have been proportionately less than the sum now paid. Taking the letter of the Department of Justice with reference to the obligations of this office arising out of the question, as being a true interpretation of the requirements of parliament from this office in connection with the undertaking, I do not see that I am supposed to have really less responsibility than I would in any other transaction of the government involving money.

Probably I need not say that if the government guarantee is sold at less than par or if the percentage of work done is less than it appears, the government guarantee would be exhausted before the completion of the work, that is by the present mode of dealing with it.

I am, sir, your obedient servant,

The Deputy Minister of Railways and Canals. J. L. McDOUGALL, *A.G.*

RAILWAYS AND CANALS DEPT., OTTAWA, January 7, 1904.

SIR,—I have the honour to acknowledge the receipt of your communication of the 23rd ultimo, with further reference to your request to be furnished with a copy of my report as Chief Engineer on the results of the inspection of the section of the Canadian Northern Railway extending from Grand View westward.

In reply, I have most respectfully to say that I can add nothing to what I have already communicated to you in the matter.

I am, sir, your obedient servant,

The Auditor General. COLLINGWOOD SCREIBER, *D.M.R. & C.*

Lake Manitoba Railway and Canal Company: Half-yearly Subsidy.

AUDIT OFFICE, OTTAWA, February 29, 1904.

SIR,—Let me call your attention to the traffic returns of the Canadian Northern Railway, which I have recently had occasion to examine in connection with the half-yearly subsidy of $20,000 for the part acquired by that railway from the Lake Manitoba Railway and Canal Company.

The traffic returns certify the whole 1,350 miles of the Canadian Northern Railway as 'open' between August 7, 1903, and February 7, 1904; but this may mean only that 1,350 is the mileage built, while some parts of it may have been closed during the winter.

Please ask the Canadian Northern Railway to make a special half-yearly certificate for the 'Lake Manitoba Railway and Canal Company' section, that traffic has been continuously maintained; or if not, to give the dates of interruption. The periods certified might end (say) January 31 and August 31, in time for the payments due March 1 and April 1. I would like this certificate for the six months ended January 31, 1904.

I am, sir, your obedient servant,

The Deputy Minister of Railways and Canals. J. L. McDOUGALL, *A.G.*

THE CANADIAN NORTHERN RAILWAY COMPANY.

I hereby certify that during the six months which ended on the 31st day of January, 1904, there was actually built and in operation continuously without interruption, from day to day, 1,350 miles of the company's railway; and that included in 1,350 miles, so operated, was the whole of the 125 miles of that portion of the railway, forming part of the company's system acquired from the Lake Manitoba Railway and Canal Company and covered by the Transport Contract or subsidy Agreement No. 12293, entered into on the 5th day of February, 1896, between the last named company and Her Late Majesty Queen Victoria, represented by the Minister of Railways and Canals.

Dated at Toronto, Ontario, this thirtieth day of March, 1904.

The Canadian Northern Railway Company

By W. N. MOORE, *Secretary.*

St. Francis Bridge: Incomplete Inspection.

AUDIT OFFICE, OTTAWA, July 2, 1904.

SIR,—Let me acknowledge receipt of your application No. 533 for $35,000 in favour of the Canadian Bridge Company, in payment of subsidy item No. 3-3 of 1903, namely, 'to the Canadian Bridge Company,' of Walkerville, to strengthen and complete the foundation and approaches to the bridge over the St. Francis river, subsidized in favour of the South Shore Railway Company, by section 3 of chapter 7 of 1899, $35,000, &c.'

Chief Engineer Schreiber's Report.

Your certificate of April 16, 1904, mentions that Engineer Simmons, on April 12, 'inspected the piers and approaches of the St. Francis bridge on the South Shore Railway, with regard to subsidy, and he reports the water being very high in the river, so that he was not able to make such a critical examination as he could desire; but that under the circumstances, as far as he was able to judge, the damaged piers have been repaired and strengthened according to the plan prepared by the department; giving a detail of the work done, much of which information he must necessarily have obtained from the contractor, &c.'

Engineer Simmons' Report.

Mr. Simmons says: 'The ice had moved out a few days before the time of my visit without doing any damage, and the water was pretty high; but as far as I was able to judge, the damaged piers have been repaired and strengthened according to the plan approved by the department. Thirty-six piles were driven around each pier, after which coffer dams were built, and the materials around the foundation-piles were excavated to a depth of about 3 feet, and it was then discovered that the piers had slipped on the piles. The rear ends of the piers were strengthened by eight 'I' beams being placed as props and covered in with concrete, the whole forming a kind of buttress. The excavations around the piles were also filled in with concrete, the upper part of the concrete when finished being on a level with low water, &c.'

Auditor General's Objections.

The 'I' beams and the concrete would appear to form a very important part of the work of 'strengthening and completing,' for which the subsidy was voted; and payment cannot be made on the mere description by the contractor as to the method of under-water construction.

Could not a diver be sent down, to verify the claims as far as possible? For all inner work now concealed by the outer work, we should have at least the affidavits of two of the persons engaged in the construction.

As a general principle, I hesitate in considering valid any certificate which has to be modified by the phrase 'As far as I was able to judge.' If, as in this case, the season makes the examination less reliable, the examination should always be deferred.

In the present instance, it is possible that a complete inspection might be made at this date, from the water having fallen sufficiently from its former high level.

I am, sir, your obedient servant,

The Deputy Minister of Railways and Canals. J. L. McDOUGALL,

RAILWAYS AND CANALS DEPT., OTTAWA, July 8, 1904.

SIR,—On the 5th inst. I made a further inspection of the bridge across the St. Francis river, on the Quebec Southern Railway, with special reference to the repaired foundations.

I was accompanied by Mr. Anthony, chief engineer of the line.

The water was about a foot above low water mark, and I was able to see that the piers had been surrounded by a mass of concrete up to low water mark. The buttresses at the lower ends of the piers have been constructed as shown on the plans, that is, as far as their outward appearance is concerned. Mr. Anthony assured me that the 'I' beams had been placed as shown on the plans, and that the piles under the con-

crete had been well driven. He expressed himself as well satisfied with the way the work on the foundations had been carried out.

A diver would be unable to see any thing, as both foundations are still surrounded by the caissons below low water.

I am, sir, your obedient servant,

The Chief Engineer, Railways and Canals. T. L. SIMMONS.

Cornwall Canal : Electrical Power Equipment.

AUDIT OFFICE, OTTAWA, September 19, 1904.

SIR,—The following information concerning the electrical working of the Cornwall canal was obtained on a trip over that canal, June 22, 1904.

Number of Motors.

Fifty-seven motors were on the canal, and all but five were in position. They were located thus :—

—	New Lock.	Old Lock.	Weir.	Bridge.
Lock 21	4	.....	1	.....
Milleroches	.....	.....	.....	1
Guard-gate	2	.....	.....	.....
Lock 20	4	4	1	.....
Lock 19	4	4	1	.....
Lock 18	4	4	1	.....
Cornwall	.....	.....	.....	1
Lock 17	4	4	1	.....
Lock 16	.....	4	.....	.....
Lock 15	4	4	.....	.....
Total, 57	26	24	5	2

Markings Stamped on Motors.

All are stamped 'Type 5; 550 volts; 60 cycles.' Five are stamped '5-phase'; all the others '3-phase.'

Forty-five are stamped 'Speed 1120'; 7 are stamped 'Speed 1150'; 3 are stamped 'Speed 1200'; and on 2 the speed is not marked.

Under the head of 'Amperes per phase,' there are 39 marked 5, 15 marked 4½, 1 marked 3½, and 2 not marked.

The omission to record a motor at the guard-gate weir may perhaps have been a mistake; but there was none there on December 3, 1902 (see Report of 1902-03, page 48).

Five Motors not in Use.

At new lock 19, upper gate, north side, motor No. 127 was out of order, and detached. Its place was filled by motor No. 347, which had been taken from old lock 19, upper gate, south side. The latter gate was left without a motor.

At old lock 15, at the foot of the old canal, all four motors had been removed in the fall of 1903, to guard against drowning by the spring floods of 1904. They were still stored in sheds on June 22, 1904; and old lock 15 was therefore not working electrically.

Old Locks 15, 16, 17 not in Use.

In addition to the motors being detached from old lock 15, the basin between old locks 16 and 17 was unwatered some time before June 22, to permit of repairs to the old canal which were going on at that date. No navigation therefore was possible through old locks 15, 16 and 17, and the motors were all idle.

Old Locks 18, 19, 20 not Generally Active.

There are several reasons why these three old locks will seldom be used except when the new locks are out of order :—First, the new locks can handle more traffic than now exists; second, the traffic is limited by the single lock No. 21, at the head of the canal; and third, the present staff cannot work two locks at once.

Single Lock at Head of Canal.

On this section the original plan was carried out, of having only one lock, namely, that built by Messrs. Jocks & Broder.

An excess of downward traffic, coming in from the river at Dickinson's Landing, would therefore filter into the canal at only a one-lock rate, and so could be passed by single locks at Nos. 20, 19 and 18.

An excess of upward traffic, entering at Cornwall, and needing two locks at 18, 19 and 20, would be unavoidably checked and congested by the single lock No. 21.

So that, even were the present diminished traffic to recover and multiply, it would not be able to pass through the canal at a faster rate than that fixed by the slowest feature, namely, the single lock at the head of the canal.

Present Staff Insufficient to Work Two Contiguous Locks.

At each of the stations Nos. 18, 19 and 20, there are 5 men, of whom 2 are off duty (for sleep, &c.), and 3 are on duty. This gives 48 hours daily rest at each lock among five men, or 9·6 hours each.

Of the three men on duty, one acts as lockmaster, overseeing the passage of the vessel. The other two men work the gates,—one man on each side of the lock,—as it is plain that both sides of the lock cannot be worked by the same man without great delay.

This arrangement leaves no workman available to open and close the old lock, in case another vessel wishes to pass at the same time.

This objection could of course be met by increasing the staff, when the traffic warrants it, and if all other difficulties are removed; but until these two conditions are fulfilled, it would seem unnecessary to pay for power at the old and new locks concurrently.

Power for Workshops.

On June 22, 1904, the construction of the proposed workshops had not been begun.

Respectfully submitted,

FREDERICK HAYTER,

Chief Clerk, Expenditure Branch.

The Auditor General.

NOTE.—The discussion is continued at page W—355.

Cornwall Lighting: Additional lights in Winter of 1902-3.

AUDIT OFFICE, OTTAWA, Nov. 19, 1904.

DEAR MR. SCHREIBER,—I have your application of November 16 instant for $4,791.-30 in favour of Mr. M. P. Davis for additional lights supplied the Cornwall Canal in

excess of 100 actually burning, viz.:—141 lights in December 1902. 137 in January, 1903. 122 in February, 1903 and 127 in March 1903.

So far as the facts are concerned this seems to be in accordance with the certificate of Mr. Stewart, superintendent of operation, but your certificate which is merely 'Approved for payment' made before the contract with Mr. Davis of August 13, 1903, does not seem sufficiently full.

One section of the contract reads : 'From the thirtieth day of November, 1902, to the thirty-first day of March, 1903, payment shall be made for one hundred lights per night; and the right is hereby expressly reserved to the said Michael P. Davis to be paid for such additional lights (in excess of one hundred) that he can show were, during such period, actually burning in pursuance of the instructions or authority of the said chief engineer, or of any person duly authorized by him.' Mr. Davis must thus show that the additional lights during such period actually burning were so burning in pursuance of the instructions or authority of the chief engineer or of any person duly authorized by him.

All that seems to me necessary to receive from you to prove Mr. Davis' right to payment is, added to this certificate, your certificate in the words of this section of the contract of August 13, 1903.

I return your application herewith.

I am, sir, your obedient servant,

The Deputy Minister, Railways and Canals. J. L. McDOUGALL, *A.G.*

RAILWAYS AND CANALS DEPT., OTTAWA, November 23, 1904.

SIR,—I have the honour to acknowledge the receipt of your communication of the 19th instant, with which you return the application that has been made to you by the department for the issue of a cheque, in favour of Mr. M. P. Davis, for the sum of $4,791.30 for certain additional lights furnished by him on the Cornwall canal, in excess of the 100 lights actually burning, namely, 141 lights in December, 1902, 137 in January, 1903, 122 in February, 1903, and 127 in March, 1903, and ask for further certificates from the chief engineer of the department.

In reply, I return the application in question, together with the accounts in that regard, which have been duly certified by the chief engineer under date the 21st instant.

I am, sir, your obedient servant,

The Auditor General. COLLINGWOOD SCHREIBER, *D.M., R. & C.*

AUDIT OFFICE, OTTAWA, November 25, 1904.

DEAR SIR,—In connection with your suit to recover the amount of your claim for lighting done on the Cornwall canal between December 1, 1902, and March 31, 1903, as you are aware, the certificates were not sent to me until after the case was entered. Application was made on the 16th November instant for the payment of the amount. I asked for a certificate from Mr. Schreiber in the words of the contract of August 13, 1903. Mr. Schreiber does not certify in these words. I therefore think it well to at once deal with yourself on this matter. What I require is sufficiently shown in my letter to Mr. Schreiber of the 19th inst., and therefore I send a copy to you. By looking at your copy of the contract you will see that on proof from you that the lighting was the result of instructions from Mr. Schreiber I am justified in paying your claim. Now, as I understand it, it is not necessary for Mr. Schreiber to certify, as he seems averse to doing, as long as you give me proof that such instructions were given to you by Mr. Schreiber. I have no directions to give you as to how you are to prove it to me but if you do prove it, my duty is to pay you.

I have some expectation of seeing Mr. D'Arcy Scott, your legal representative in the case, as the Secretary of State promised to ask Mr. Scott to see me as soon as he returned to town, but I thought it well, in the meantime, to write you direct on the subject.

I may say that I am passing the applications of the St. Lawrence Light and Power Company that have reached me, except that for September, which is in excess of previous ones, and which I am holding for further particulars as described in my letter to Mr. Schreiber of to-day's date.

I am, sir, your obedient servant,

M. P. Davis, Esq., Ottawa. J. L. McDOUGALL, *A.G.*

OTTAWA, ONT., November 28, 1904.

DEAR SIR,—I beg to acknowledge the receipt of your letter of November 25.

In reply, I beg to say that I do not consider that I have to give any other proof than Mr. Schreiber's certificate that the work has been done, and that payments on the same are due.

I am, sir, your obedient servant,

The Auditor General. M. P. DAVIS.

AUDIT OFFICE, OTTAWA, November 29, 1904.

DEAR SIR,—I beg to acknowledge the receipt of your letter of the 28th instant. I think that I cannot add any thing to what I have said in my previous communication to which yours is a reply, on the Cornwall electric lighting supplied by you between November 30, 1902, and March 31, 1903, except to ask you to see Mr. Schreiber with my letter and tell him, if he agrees with you, to treat this letter as an intimation that I have declined to pass the application; and therefore, as a justification for applying to the Treasury Board for an overruling of my decision.

The whole foundation for this claim rests upon the contract of August 13, 1903. I am not now at all in doubt that you supplied the light, payment for which you make demand. It requires no proof that it was useless in the public interest. You, however, take the ground that it was not for you to determine its utility. You were not the chief engineer, but the supplier of the electric light. It was the chief engineer who had the right to give instructions as to whether the light was to be supplied or not. Prove to me that the instructions were given by the chief engineer, and I shall pass the account.

I am not questioning now the motives of the chief engineer in giving the instructions. The question is, were they given?

I am, sir, your obedient servant,

M. P. Davis, Esq., Ottawa. J. L. McDOUGALL, *A.G.*

RAILWAYS AND CANALS DEPT., OTTAWA, Dec. 2, 1904.

SIR,—I have the honour to acknowledge the receipt of your communication of the 29th ultimo, with which you transmit a copy of a letter addressed by you on the above date to Mr. M. P. Davis, relative to the electric lights furnished by him on the Cornwall Canal between November 30, 1902, and March 31, 1903.

In reply, I have to thank you for your courtesy in transmitting a copy of the letter in question. I would, therefore, observe that I have given my certificate on the accounts

for the lighting in question, and that I see no good reason to change it, as it is based on the facts of the case.

I am sir, your obedient servant,

The Auditor General. COLLINGWOOD SCHREIBER, *D. M., R. & C.*

RAILWAYS AND CANALS DEPT., OTTAWA, Dec. 5, 1904.

SIR,—In supplement to my letter to you of the 2nd instant, relative to the electric lights furnished by Mr. M. P. Davis on the Cornwall Canal between Nov. 30, 1902, and March 31, 1903, I have the honour to inclose herewith, for your further information, a copy of a letter addressed by me on April 10, 1902, to the superintendent of operation, River St. Lawrence Canals, in the matter.

I am, sir, your obedient servant,

The Auditor General. COLLINGWOOD SCHREIBER. *D.M.*, (L.K.J.)

RAILWAYS AND CANALS DEPT., OTTAWA, April 10, 1902.

MY DEAR SIR,—I wish you to at once locate the balance of the 250 electric lights on the Cornwall Canal so that Mr. Davis may erect the poles, &c. Be careful to so locate them as to be of most service to the canal.

Yours truly,

W. A. STEWART, Esq., Morrisburg. COLLINGWOOD SCHREIBER.

TORONTO, December 5, 1904.

DEAR SIR,—On December 1, we wrote Mr. Schreiber in the following terms :—

'As you are aware, we are preparing now for the trial in this petition of right. Copies of the certificates approved for payment by you have been furnished to us. They are dated respectively, January 16, 1903, February 17, 1903, and March 17, 1903. We have been furnished also with copies of the supplementary certificates dated November 21, confirming the previous certificates.

'The contract provides for payment for 100 lights per night, and for such additional lights in excess of 100 that M. P. Davis can show were during such period (*i.e.* November 30, 1902 to March 31, 1903) actually burned in pursuance of the instructions or authority of the Chief Engineer or of any person duly authorized by him. The Crown has no defence to this action if the additional lights were burned in pursuance of your instructions or authority, or of any person duly authorized by you.

'We shall be glad if you advise us at your earliest possible convenience whether these lights were burned in pursuance of any such instructions or authority. If they were so burned, then we will submit to judgment at once and save all further expense, but if there were no such instructions or authority, then we will feel bound to continue the defence of the action of the Crown's discretion.

'We have had some conversation with Mr. D'Arcy Scott in the matter. He is acting as solicitor for the suppliants and we understand from him that he intends subpœaning Mr. W. A. Stewart, superintendent of operation, to prove that he gave some instructions for the burning of the extra lights.

Will you be good enough to let us know whether Mr. Stewart was authorized by you to instruct or authorize the burning of the additional lights.'

Mr. Schreiber replied as follows :—

'I have to say that I instructed Mr. Superintendent Stewart to stake out the positions in which the electric light poles were to be set out; the contract itself fixed

the minimum number of lights at 250, and I took care to keep myself informed as to the number of lights burned, and to guard against a larger number than 250. My certificate and the returns with which you have been furnished show the numbers actually burned. They were so burned with my knowledge and consent given in pursuance of and in accordance with the contract.'

I cannot understand why Mr. Schreiber did not in reply to your letter of November 19 advise you that the number of lights burned during the period from November 30, 1902 to March 31, 1903, as shown by his certificates, were so burned with his knowledge and consent, given in pursuance of and in accordance with the contract.

In view of this letter of Mr. Schreiber's, I think the four certificates for December, 1902, and January, February and March, 1903, should be paid, and that I should make the best arrangements I can in regard to the staying of the suit.

Yours truly,

The Auditor General.

WALTER BARWICK.

AUDIT OFFICE, OTTAWA, December 6, 1904.

WALTER BARWICK, K.C.,
Toronto, Ont. (Telegram.)

Shall pay applications of Railway Department *re* electric light to-morrow morning.

J. L. McDOUGALL, *A.G.*

Cornwall Canal Light and Power: Transfer to St. Lawrence Power Co.

Extract of O. C. Feb. 6, 1904.

RAILWAYS AND CANALS.

On a memo. dated August 20, 1903, from the Acting Minister of Railways and Canals, submitting for the approval of the Governor General in Council, a proposed contract to be entered into by His Majesty with Mr. M. P. Davis and the Quebec Bank, in respect of the supply of electric power and lighting for the Cornwall Canal, under the provisions of the lease dated June 25, 1896, to Mr. Davis, but since assigned to the bank, of water power and other privileges at Sheik's Island dam on the said canal.

The minister recommends that he be authorized to execute the said contract.

The committee submit the same for approval. J. J. McGEE, *C.P.C.*

Re Draft Assignment of Mr. M. P. Davis and the Quebec Bank to the St. Lawrence Power Company, Limited, submitted for Order in Council to authorize the minister to execute the same.

I do not consider it advisable for the government to execute this Assignment as drafted, for the purpose of approving the same in the manner therein stated.

As far as the government is concerned it is merely necessary to pass an Order in Council consenting to the Quebec Bank and Mr. Davis making a bald assignment of the lease (as supplemented and modified by the two supplementary agreements) with the property, rights and privileges thereby demised, to the power company and consenting to the power company, upon such assignment being made to it, mortgaging its interest to.....(the parties' names should be given).

A duplicate original of such assignment and mortgage, it should be provided, is to be filed in the department as a condition precedent to their taking effect.

By approving of the assignment as drafted and executing the same the government takes the risk of prejudicing some of its rights and becomes as much bound by the

terms of the assignment as of the lease itself. The usual method of procedure with respect to assignments requiring the necessary approval is to have them first executed by the parties—the government being no party to the assignment—and then submitted to the department. By this means the government is always enabled to ascertain with whom it is dealing with respect to its property under lease.

May 3, 1904. (Signed) "A."

(Note.—Mr. H. F. Alward, Asst. Law Clerk, R. & C. Dept.)

RAILWAYS AND CANALS DEPT., OTTAWA, May 6, 1904.

SIR,—I have the honour, by direction, to inform you that there has been sent in to this department a draft of an indenture to be executed by Mr. M. P. Davis, the Quebec Bank, the St. Lawrence Power Company, Limited, and the Crown, covering the assignment by Mr. M. P. Davis and the Quebec Bank to the St. Lawrence Power Company, Limited, of a certain lease 12336, dated June 25, 1896, of part of lot No. 1 at the lower end of Sheik's island, in the township of Cornwall, together with surplus water, and further, the assignment of certain contracts made by this department with Mr. Davis for electrical lighting and power on the Cornwall canal.

I inclose this draft, together with a memo., from the departmental law clerk, which gives his views in the matter, and points out the usual course followed in consenting to assignments, and am to request that the department may be favoured with your advice as to whether the execution of such indentures by the Crown would be proper and expedient in the public interests.

I am, sir, your obedient servant,

The Deputy Minister of Justice. L. K. JONES, *Secretary.*

DEPT., OF JUSTICE, OTTAWA, May 10, 1904.

SIR,—I have the honour to acknowledge receipt of your letter of the 6th instant, 133188, and in reply I beg to state that in my opinion it would be proper for the Minister of Railways and Canals, if thereunto authorized by Order in Council, to execute the instrument to which you refer, being an assignment from M. P. Davis and the Quebec Bank to the St. Lawrence Power Company of a certain lease of land and water-power at Sheik's island, and of the rights of Davis and the Bank under certain contracts, for the purpose of expressing the consent of the Crown to the assignment, provided that certain changes indicated by me in pencil are first made therein. The changes will be found in the last paragraph of the recitals, and in the paragraph consenting to the proposed mortgage trust deed, being paragraph 3.

With regard to the expediency of executing the assignment, I agree with the law clerk of your department that the practice which he states is the usual one should ordinarily be followed ; but as in connection with the present case, the assignment to the Quebec Bank seems to have been executed by the minister, there may be no objection to the like action being taken now, provided the parties agree to the changes I have proposed.

I am, sir, your obedient servant,

The Secretary, Railways and Canals. E. L. NEWCOMBE, *D.M.J.*

EXTRACT FROM AN ORDER IN COUNCIL DATED MAY 16, 1904.

On a memo. dated May 14, 1904, from the Minister of Railways and Canals, representing that there has been sent in to the Department of Railways and Canals a

draft of a proposed deed of assignment between Mr. M. P. Davis and the St. Lawrence Power Company, Ltd., and the Quebec Bank, and His Majesty in regard of certain lease of Cornwall canal land and water power, dated June 25, 1896, granted to Mr. Davis, and also in regard of an agreement, dated October 19, 1900, for the supply of electrical lighting and power for the Cornwall canal; also in regard of an assignment of the said lease and agreement to the Quebec Bank, which assignment was consented to by the Crown; also in respect of an agreement dated August 13, 1903, modifying the provisions of the said lease and agreement in respect of the supply of power and light.

The minister further represents that by the said proposed draft assignment it is intended to transfer to the St. Lawrence Power Company, Ltd., all the property and premises demised by the lease of June 25, 1896, together with the water-power, buildings, machinery, and all right, title and interest, both of the Quebec Bank and of Mr. Davis in the premises; also their right, title and interest in the agreements above mentioned for electrical lighting and power. To this assignment consent of the Crown is desired; such consent to be evidenced by the signature of the Minister of the Department of Railways and Canals, and its seal.

That the St. Lawrence Power Company, Ltd., was incorporated by the Act 1, Edward VII., chap. 3, 1901, with extensive powers for the generation of electrical and other power, and for the manufacture of various industrial and commercial products, it being, however, provided that the plans for their works should be submitted to and approved by the Governor in Council.

That the said draft assignment has been submitted to the Department of Justice, as to the propriety in the public interests of the execution thereof by the Minister of the Department of Railways and Canals, and under date the 10th May inst., they have advised that such execution, if authorized by an Order in Council, would be proper, provided certain changes, indicated by them were made in the draft.

The minister states that the changes suggested by the Department of Justice have been made accordingly, and he, the minister, submits the draft assignment so modified, and recommends that he be authorized to sign it on behalf of the Crown.

The minister further submits plans and specifications which have been sent in of the works for head-race, tail-race, power-horse, foundations and buildings for water development at the site in question, and which have been approved by the chief engineer of the Department of Railways and Canals, under date the 2nd May instant, and the minister recommends that the same be approved.

The Committee submits the same for approval.

JOHN J. McGEE, *C.P.C.*

AUDIT OFFICE, OTTAWA, July 13, 1904.

SIR,—I have just received from your department a copy of the Order in Council of May 16, 1904, giving authority for the assignment by Mr. M. P. Davis of his contract for Cornwall lighting and power to the St. Lawrence Power Co.

The Order in Council mentions that the draft assignment was submitted to the Justice Department.

Please let me see the correspondence between the Railways and Canals and Justice Departments, relating to this assignment.

I shall be obliged by your attending to this at once, as there are urgent inquiries for early disposal of the matter.

I am, sir, your obedient servant,

The Deputy Minister, Railways and Canals. J. L. McDOUGALL, *A.G.*

RAILWAYS AND CANALS DEPT., OTTAWA, July 18, 1904.

SIR,—In compliance with the request contained in your communication of the 13th instant, I have the honour, by direction, to enclose herewith a copy of the correspondence that has taken place between this department and the Department of Justice, relative to the approval of an assignment by Mr. M. P. Davis, to the St. Lawrence Power Company of the lease granted to him on June 25, 1896, of certain Cornwall Canal reserve land and water power, and of other collateral agreements in that connection.

I am, sir, your obedient servant,

The Auditor General. L. K. JONES, *Secretary.*

TORONTO, July 27, 1904.

DEAR SIR,—By lease dated June 25, 1896, made under the authority of Act 52 Vict., chap. 13, sec. 33, the Crown demised to M. P. Davis certain land, part of the Cornwall Canal property, and so much of the surplus water of lock No. 20 level as the lessor might deem advisable after navigation and existing mills were supplied, with the right to construct a weir, &c.; for the term of twenty-one years from July 1, 1896, with a right of renewal. The lease contained a covenant by the lessee to supply electric power for the working of the locks, and electric lighting for the canal. No assignment of the lease or of the rights of the lessee was to be made without the consent in writing of the lessor.

The lease contains this stipulation : 'If at any time hereafter the land hereby 'demised and the quantity of surplus water leased, or which may hereafter be leased, 'according to the intent and meaning hereof, or any thereof are or is required for the use of the canal or for any other purpose whatsoever, or if the lessor shall elect to take over any and all buildings and works or erections constructed upon the land hereby demised, or increased flow of water so passing or to pass through the works of the said lessee through Hoople's Creek, and to take over any and all works, and lands through which the said increased flow of water passes thereupon on reasonable notice (not less than twelve calendar months) being given to the *lessee to* that effect, this lease or the lease for the term then current and all the covenants, privileges and rights of the *said lessee* shall cease and be void and the lessor shall pay the then value of all such buildings, lands and works with an addition of five per cent thereto that may be at that time thereon erected or connected therewith and *belonging to the lessee ;* and that, in default of agreement as to the valuation of such buildings, lands and works, their value shall be ascertained by three arbitrators, &c.'

Subsequently on October 19, 1900, the Crown entered into an agreement with Mr. Davis that the horse power to be supplied should not be less than four hundred in any one year, and the arc lights not less than two hundred and fifty, nor, without the consent of the lessor, more than two hundred and seventy. This agreement provided that nothing therein should be taken to vary the provisions of the lease. It also provided that it should extend for twenty-one years from the date of the lease, and thereafter by successive renewals to July 1, 1979 ' thus making the term of this contract co-existent with the leasing portion of the said indenture.'

The lessee assigned this lease with the assent of the Crown to the Quebec Bank to secure advances, but this document I have not seen.

By an agreement made on August 13, 1903, between the Crown, Mr. Davis and the Quebec Bank it was agreed that the lease and the agreement of October 19, 1900, should be varied by an alteration in the quantity of horse power to be furnished and the number of lights to be supplied. And this agreement declared that it should be read with and considered as supplemental to the said lease and agreement of October 19, 1900, 'and save as hereinbefore otherwise expressly provided.....the covenants, conditions, stipulations and agreements in the same indentures contained shall remain in force,' &c.

By an assignment dated May 2, 1904, and made between Mr. Davis, the St. Lawrence Power Company, Limited, (a company incorporated by 1 Edward VII, chap. 3, for the purpose of manufacturing and dealing in electricity, water and gas, with large powers of expropriation), the Quebec Bank and the Crown, M. Davis and the bank, as mortagees, assigned the lease and all other rights and contracts to St. Lawrence Power Company, the Crown joining in the assignment 'for the purpose only of consenting to the assignment hereby made and for the other purposes hereinafter appearing.'

This assignment contains the following stipulation :—'And whereas the assignee has authorized, or is about to authorize, an issue of first mortgage debentures or bonds of the assignee to the extent of $300,000, and the making of a mortgage trust deed covering and embracing all or some part of the assets, property and premises of the assignee, for securing said issue of debentures or bonds with interest. Now, His said Majesty doth hereby consent to the charging, mortgaging or otherwise assigning of the said indentures and agreement.....and of all or any of the property, leases, rights of renewal, water powers, water rights and other rights, privileges, easements, appurtenances, contracts, agreements and premises mentioned and comprised therein, and especially the contracts and agreements with His said Majesty mentioned and comprised therein, and relating to the furnishing and supplying to the Cornwall canal of electric power and electric light, and of all the said rentals and moneys now or hereafter payable by His said Majesty for and in respect of such supply of electricity, and the full benefit and advantage of the said contracts, agreements, rentals moneys and premises; all for the purpose of securing any such issue of debentures or bonds of the company to the extent of $300,000 as aforesaid and interest. Provided that the provisions of such mortgage trust deed or other instrument so charging mortgaging or otherwise assigning the premises shall be satisfactory to the Minister of Railways and Canals.'

I am asked whether, by or in consequence of, any of the dealings with the original lease and demised property, the right of the Crown to exercise its privilege of buying out the demised property on twelve months' notice has been impared or in any way affected.

My opinion is that the condition for purchase of the plant, &c., is by the wording of the assignment retained in force. The habendum (p. 8 of the copy shown me) provides that the assignment is subject 'to the conditions by and in the said indenture of lease.....reserved and contained.'

In view of the powers of expropriation which the St. Lawrence Company has under its special Act, I should myself have been cautious to define in exact terms that the power of the Crown to buy out was not intended to be effected in any way; but no doubt the Crown has been advised upon this.

As a matter of fact, as distinguished from the mere theoretical construction of the documents, I think that the power to buy out has been somewhat impaired. The lease was originally for twenty-one years with right of renewal, but the terms upon which the right is exercisable are not stated in the lease but in 'terms and conditions' annexed; see habendum of lease, p. 3 of copy shown me. By the agreement of October 19, 1900, the power and lighting contracts are made absolutely renewable until 1979, 'thus making the term of this contract co-existent (co-extensive) with the leasing portion of the said indenture.' From this I should judge that the 'terms and conditions' provide for a right of renewal until 1979. This gives greater security to the lessee and justifies a larger expenditure, and though it does not affect the legal right to buy him out, it impairs the privilege of buying out by making it more onerous.

Again by the assignment to the St. Lawrence Power Company, to which the Crown is a party and assets, the Crown has assented to the power company's raising $300,000 by mortgage bonds, provided the covering mortgage is satisfactory. The Crown by assenting to this and other terms in the assignment, is bound by them, and not only is estopped as to matter contained in the deed, but will also be estopped as

to all that is done afterwards on the faith of the deed; *Keith vs. Garcia & Co.* (1904) 1 chap. 774. If the privilege of buying out were attempted to be exercised after such a mortgage were made, the Crown might be seriously hampered as to the amount of compensation to be paid. The original lease provides that the compensation shall be the value of the works at the time of buying *plus* five per cent. But if, with the assent of the Crown expressly given for that purpose, a mortgage of $300,000 is raised on the faith of this assignment, I think it would be extremely difficult for the Crown to contend that it should not pay this amount at any rate, whatever the value of the works might be.

It is also to be observed that the condition for purchase contained in the lease is confined by its terms to the lessee. This is enlarged by the assignment, which is made subject to the conditions of the lease, and, as I have already stated, I think the assignees are bound by it. But the amount of compensation to be paid is only for buildings 'belonging to the lessee'. There is a large expenditure contemplated by the St. Lawrence Power Company, who are not lessees within the term used in the condition of the lease, and, if the privilege of buying out were exercised, a question would at once be raised whether the Crown would be bound to pay not only the moderate works contemplated by the lease, but also the very large commercial undertaking contemplated by the charter of the Power Company.

Again the notice of buying out to be given is to be given to 'the lessee'. No provision is made in the assignment to the power company as to how notice should be given in the event of a number of debenture holders springing up, who would thereby become assignees of the property. It is found by experience that there are always some debenture holders in a case of this kind who cannot be found, and a practical difficulty in proceeding might here arise at once.

As the proposed covering mortgage has still to be submitted to the minister, it is still quite open to the Crown to avoid the difficulties above mentioned, which, in some municipal cases and in buying out light, water and power companies, have actually occurred in practice.

In my opinion the Crown, in assenting to or approving of the proposed covering mortgage may avoid these difficulties, and their effect in impairing the right of purchase, by providing :—

1. That the approval or assent of the Crown to the assignment already made, and to the covering mortgage should not be taken as in any way impairing or fettering the right of buying out contained in the original lease.

2. That its approval or assent to the raising of money to the extent of $300,000 should not be taken as any indication of the present or future value of the works, or as binding the Crown to pay more than the amount originally contemplated and provided for by the lease, nor should it commit the Crown in any way to a redemption of the bonds or any part of them.

3. That it should be made clear whether the right of buying out is to extend to all works which may hereafter be executed, &c., by the power company.

4. That, if the privilege to buy out is to be exercised, the notice shall not be required to be given to the bondholders or any of them, nor to the trustee or trustees of the mortgage, but to the St. Lawrence Power Company only. The reason for this provision is that the amount of the debt secured by the property does not affect the value of the property intended to be bought. But, if it is considered that the bondholders should be heard, then provision should be made that the notice provided for by the original lease should be sufficient if given to the mortgagee or trustee of the covering mortgage for the time being, as well as to the St. Lawrence Power Company, and that it should not be necessary to notify any bondholder.

I am, sir, your obedient servant,

The Auditor General. E. DOUGLAS ARMOUR

AUDIT OFFICE, OTTAWA, July 30, 1904.

SIR,—I beg to inclose herewith a copy of a legal opinion which I obtained from Mr. Armour, of Toronto : Mr. Aylesworth, whom I usually consult, being out of Canada. This may be considered of some importance to you. Would you kindly say whether you think that the application for payment ought to be affected, or whether it will be considered advisable by your department to take the precautions suggested by Mr. Armour, or any others, in the matter ?

I am, sir, your obedient servant,

The Deputy Minister, Railways and Canals. J. L. McDOUGALL, *A.G.*

AUDIT OFFICE, OTTAWA, August 24, 1904.

SIR,—Let me call your attention to my letter of July 30, inclosing a copy of an opinion from Mr. E. Douglas Armour, K.C., of Toronto, concerning the transfer of the Cornwall canal lighting and power contract from M. P. Davis to the St. Lawrence Power Company.

Hon. Mr. Emmerson, in a recent conversation, mentioned that the Railways Department had obtained an opinion from the Justice Department, on the subject of Mr. Armour's letter, and said that the opinion would be forwarded to me. I shall be glad to receive it soon.

I am, sir, your obedient servant,

The Deputy Minister, Railways and Canals. J. L. McDOUGALL, *A.G.*

AUDIT OFFICE, OTTAWA, November 9, 1904.

SIR,—Concerning the Exchequer Court suit by the St. Lawrence Light and Power Company, for payment of their accounts for light and energy on the Cornwall canal, under the contract assigned to them by Mr. M. P. Davis:

You have, I think, a copy of a legal opinion given to me by Mr. E. Douglas Armour, of Toronto, holding that the Dominion would sacrifice several valuable rights by assenting to the assignment as it is now drawn.

From my own investigation into this class of accounts it seems to me most important that the hold of the government on the expropriation power should not be weakened.

It is for this reason that I have not passed the applications earlier, hoping that the subject would receive reconsideration. I inclose the file of correspondence, including Mr. Armour's opinion, and hope that Mr. Barwick may be able to prepare a good case.

I am, sir, your obedient servant,

The Deputy Minister, Justice Department. J. L. McDOUGALL, *A.G.*

TORONTO, November 24, 1904.

DEAR SIR,—All the papers in connection with the petition of right presented by the St. Lawrence Power Company, Limited, have been submitted to us, including your own files, the files of the Department of Railways and Canals, and of the Department of the Minister of Justice.

The original lessee was M. P. Davis, who by deed of May 2, 1904, assigned all his interests under the original lease of June 25, 1896, to the St. Lawrence Power Company, Limited.

The Crown was a party to the assignment of May 2, 1904, and under authority of an Order in Council this assignment was duly executed by the Crown, represented by the Minister of Railways and Canals.

The instrument, so far as it is an assignment, is in no way unusual in its form. The instrument, however, contains a clause under which the Crown consents to the company mortgaging its rights and interests under its agreements with the Crown for the purpose of securing by mortgage an issue of the company's debentures to the extent of $300,000, 'provided that the provisions of such mortgage, trust, deed, or other instrument so charging, mortgaging, or otherwise assigning the premises shall be satisfactory to the Minister of Railways and Canals.'

I am informed by the Deputy Minister of Railways that no mortgage trust deed has as yet been submitted to the Minister of Railways and Canals. It appears to me that the proper time to consider how the rights of the Crown shall be preserved will be when the draft mortgage trust deed is submitted to the Minister of Railways and Canals. That would be the proper occasion to see that the instrument of mortgage contains such provisions as will preserve all the Crown's rights under the original indenture of lease and supplemental agreements.

The petition of right which has been presented claims payment of accounts which have been approved for payment by the Chief Engineer of Railways and Canals, as shown by his certificates.

An application has been made by the solicitors for the suppliants to fix December 1 for the trial of this petition. Our firm have written the solicitors for the suppliants that we understand the certificates will now be paid and that there is no necessity for incurring the costs of a trial in connection with the claim.

I am, sir, your obedient servant,

The Auditor General. WALTER BARWICK.

AUDIT OFFICE, OTTAWA, Nov. 29, 1904.

SIR,—On November 24 I received a letter from Mr. Walter Barwick, who is acting for the Crown in Mr. M. P. Davis' several cases now before the Exchequer Court, stating that he had recently learned from you that the mortgage of the St. Lawrence Power Company, on which bonds were to be issued, had not been assented to by the Crown.

I therefore passed the certificates for the supply of electric energy and light in their favour from May to August 1904, inclusive.

Before passing any claims for a time subsequent to the date of Mr. Barwick's conversation with you above referred to, I shall require, either to learn from you that no such mortgage has been assented to, or to see the mortgage.

I am, sir, your obedient servant,

The Deputy Minister, Railways & Canals. J. L. McDOUGALL, *A.G.*

RAILWAYS AND CANALS DEPT., OTTAWA, Dec. 1, 1904.

SIR,—I have the honour to acknowledge the receipt of your communication of the 29th ultimo, to the effect that you are in receipt of a letter from Mr. Walter Barwick, who, you say, is acting for the Crown in the matter of Mr. M. P. Davis' several cases in connection with the Cornwall Canal now before the Exchequer Court, stating that he had learned from me that the mortgage of the St. Lawrence Power Company, on which bonds were to be issued, had not been assented to by the Crown ; that you, therefore, passed the certificates for the supply of electric energy and light in favour of the company from May to August, 1904, inclusive, but that, before passing any claims for a time subsequent to the date of Mr. Barwick's conversation with me, above referred to, you will require either to learn that no such mortgage has been assented to, or to see the document, itself.

In reply, I have to say that neither the minister nor the department is aware of the existence of such a mortgage, and that, consequently, no such document has been assented to by the minister.

I am, sir, your obedient servant,

The Auditor General. COLLINGWOOD SCHREIBER, *D. M., R. & C.*

Lachine Canal Basin : Widening Roadway.

AUDIT OFFICE, OTTAWA, August 12, 1904.

SIR,—With reference to our conversation yeesterday, I wish that you would send me a letter containing your view as to the advisability of making an arrangement with the contractors, Quinlan, Coulson & Robertson for the formation of a widened roadway along the Lachine Canal basin.

It seems to me that there ought to be a possibility of finding under the existing contract a sound argument for offering to the contractors the value of the saleable material in the dam, less the cost to the contractor of delivering it to the purchaser ; that is, if nothing still more favourable in the interest of the government could be done.

I am, sir, your obedient servant,

The Deputy Minister, Railways and Canals. J. L. McDOUGALL, *A.G.*

RAILWAYS AND CANALS, OTTAWA, August 16, 1904.

SIR,—I have the honour to acknowledge the receipt of your letter of the 12th instant, asking for my views as to the advisability of entering into arrangements with Messrs. Quinlan, Coulson & Robertson for the formation of a widened roadway along the northerly side of the old Lachine canal basin No. 1.

In reply, I have to say that the parties in question are, at present, the contractors for the work of rebuilding locks Nos. 1 and 2 on the Lachine canal adjacent to this basin, which lies between them. These contractors have already, at a cost of several thousand dollars, constructed, in order to the prosecution of their contract work, two dams which are requisite for their unwatering.

For the construction of the proposed roadway, it would be necessary to unwater; and, inasmuch as Messrs. Quinlan, Coulson & Robertson have already the dams in place, it would not only result in a great saving of time, but also in saving a considerable expenditure of money were they to be called upon, as I have suggested that they should be, to carry out the work of building the roadway as an extension of their present contract, the work embraced in which the proposed roadway may be regarded as subserving.

My explanation may possibly commend itself to you, as affording good ground for this suggested course, in place of incurring the delay and expense of obtaining tenders for the work as a separate undertaking.

I am, sir, your obedient servant,

The Auditor General. COLLINGWOOD SCHREIBER, *D. M. R. & C.*

AUDIT OFFICE, OTTAWA, September 12, 1904.

SIR,—Let me acknowledge receipt of your 134809 of August 16, 1904, concerning the proposed widened roadway at basin No. 1 on the old Lachine canal.

This subject has been held over for several days, in the hope that some explanation would occur to me, which would reconcile your plan with the limitations imposed by the Railways and Canals Act, as to the letting of contracts by public tender.

I am, however, unable to see that the circumstances are such as to constitute the 'pressing emergency' allowed in the Act; and there seems no other course open but to advertise for tenders.

We are not in any way bound to Messrs. Coulson, Quinlan & Robertson by the fact that they have built unwatering dams on an adjacent work, which would be serviceable on this section also. It is within your province as Chief Engineer, to fix a compensation to the present owners of the dams, and expropriate them to be public property. They would then be available to any successful tenderer for the new work, and this fact could be advertised in the specification.

I am, sir, your obedient servant,

The Deputy Minister Railways and Canals. J. L. McDOUGALL, *A.G.*

Soulanges Canal, Section 9 : Extra Claims by Manning and Macdonald.

AUDIT OFFICE, OTTAWA, August 8, 1904.

SIR,—Let me acknowledge receipt of your application of the 5th instant No. 727 for $2,127.50 in favour of Manning & Macdonald, being balancee of their 'Second Revised Final Estimate' for work on section 9 of the Soulanges canal.

The original final estimate was dated November 27, 1900; the revised final estimate was dated August 13, 1903, and the second revised final estimate (now in hand) is dated January 7, 1904. It would be more satisfactory if a final estimate could be made a complete and definite settlement.

The items making up the present application are :—

Water-tight bank : 3,704 cy. at 25 cents	$ 926 00
Unwatering for removal of slides :—	
Rent of pumps and boilers, 160 days at $3	480 00
Engineer in charge, 160 days at $2	320 00
Coal, 73 tons at $5.50	401 50
	$2,127 50

There should be an explanation of the reasons for not including these items in the previous estimates. Dates should be given for each service.

Please let me see the correspondence.

I am, sir, your obedient servant,

The Deputy Minister Railways and Canals. J. L. McDOUGALL, *A.G*.

RAILWAYS AND CANALS DEPT., OTTAWA, August 11, 1904.

SIR,—I have to acknowledge the receipt of your letter of the 8th instant, requesting an explanation of the reasons for not including certain items, amounting to $2,127.50, in the revised final estimate for work on section 9 of the Soulanges Canal, under the contract of Messrs. Manning and Macdonald.

I quite agree with you that, if possible, a final estimate should be made a complete and definite settlement.

In the present case, however, the final was prepared independently of these extras, which had never been submitted to me. With regard to the revised final, it is based on the disposition of claims in so far as the information then before me was available; subsequently further information was presented, satisfying me that the amount I have now certified to was for proper extra work, performed at prices which I considered fair and just.

I may add that I have rejected a large number of extra claims which the contractors are asking the minister to be allowed to submit to him. I have, however, certified all to which I consider them entitled.

I inclose the papers, as requested, and shall be obliged if you will return them as soon as possible.

I am, sir, your obedient servant,

The Auditor General. COLLINGWOOD SCHREIBER, *D.M. R. & C.*

Soulanges Canal, Section 13: Extra Claims by Manning and Macdonald.

AUDIT OFFICE, OTTAWA, August 9, 1904.

SIR,—Let me acknowledge receipt yesterday of your application No. 728 for $34,-182.52 in favour of Manning & Macdonald, being balance of a revised final estimate for their work on section 13 of the Soulanges Canal.

There is a previous final estimate, dated August 18, 1903, for $682,407.75. The one now in hand, for $716,590.27, is dated January 11, 1904, and certified by yourself January 12. It would be preferable to have the first settlements complete; but proposed alterations should be sent to this office as soon as definitely established, to afford us more opportunity for examination than is available at this season of the year, when the accounts are on the point of closing.

The principal additions are as follows:—

23: selected material behind walls, 28,542 c. y., at 50c..	$14,271 00
5: rock excavation, 4,652 c. y., at $1.20..	5,582 40
Stone delivered for backing, not used on account of change in plan, 1,190 c. y., at $3.50..	4,165 00
Removing crib No. 2, south, and dredging seat..	2,939 40
Hand-picked boulder-stone for crib-filling, 5,474 c. y., at 80c. instead of 40c..	2 189 60
Sundry smaller increases..	5,035 12
	$34,182 52

Explanations should be given for allowing these items now, since they were not included in the previous final estimate of August 18, 1903. The date of each item should be shown. Please let me see the correspondence.

There should be evidence to show that orders for extra work were given in writing, with prices fixed before the work was begun, as provided by the contract; also that claims were repeatedly presented by the contractors.

I am, sir, your obedient servant,

The Deputy Minister, Railways and Canals. J. L. McDOUGALL, *A.G.*

RAILWAYS AND CANALS DEPT., OTTAWA, August 15, 1904.

SIR,—I have to acknowledge the receipt of your letter of the 9th instant, relative to application No. 728, for $34,182.52, in favour of Manning & Macdonald, being balance of a revised final estimate for their work on section 13 of the Soulanges canal.

I have noted your remarks, and an endeavour to comply with your wishes will be made.

As regards the items composing the $34,182.52, I may explain that I went most carefully into thesee matters with Mr. A. J. Grant, the late Mr. Monro's chief assistant, who, together with the contractor, explained all the circumstances attending the execu-

tion of these works, and proved to my satisfaction that they were proper charges, and that the prices are fair and just.

I herewith inclose the papers in this connection, as requested, and would be pleased to have them returned as soon as possible.

I have to add that orders in writing for these works do not appear to be given, and, under the circumstances, steps will be taken to obtain a waiver of the contract provisions in that connection.

I am, sir, your obedient servant,

The Auditor General. COLLINGWOOD SCHREIBER, *D.M. R. & C.*

AUDIT OFFICE, OTTAWA, Aug. 16, 1904.

SIR,—In further discussion of Manning & Macdonald's Revised Final Estimate on section 13 of the Soulanges Canal :

Concerning the claim 'Hand-picked boulder-stone for crib-filling; 5,474 c.y. at 80c. instead of 45c., $2,189.60', the contractors state, at page 65 of their factum, 'The engineer required that stone should be placed inside the crib before material from outside was placed therein. We consider that the filling of hand-picked boulder-stone was not necessary, nor is it called for either in our contract or tender and was not contemplated at that time'.

Section 23 of the specification reads: 'The ballast for crib-filling shall consist of approved material arising either from the dredging of the outside shoal, the entrance channel, or the excavation on the section, as may be decided. No stones larger than a cubic foot will be admitted. *The ballast to be placed and packed under and around the ties* so as to ensure solid filling throughout in such a manner as will be described. The cribs shall be sunk either by placing a sufficient number of old rails on top, or by the adoption of such other means as may be approved by the engineer.'

It is not at present clear to me, how the method followed by the contractors differed from whatever is anticipated by the underlined words 'The ballast to be placed and packed under and around the ties'. Please ask Mr. Macdonald to enlarge his explanation on this point.

It might conduce to clearness, if he specified the source from which he obtained the 'hand-picked boulders'.

I am, sir, your obedient servant,

The Deputy Minister, Railways and Canals. FREDERICK HAYTER, *for A.G.*

RAILWAYS AND CANALS DEPT., OTTAWA, Aug. 26, 1904.

MY DEAR SIR,—Herewith please find copy of a letter dated the 25th instant from Mr. Randolph Macdonald for Manning & Macdonald, giving further information as to item of claim for hand-picked boulder stone in crib-filling.

Mr. Grant states that though he can give no positive information about the stone filling, he is aware that Mr. Macdonald hauled a quantity of stone from the fields for the said purpose, as he saw the teams arriving with it at various times.

I am, sir, your obedient servant,

The Auditor General. COLLINGWOOD SCHREIBER, *D.M., R. & C.*

THREE RIVERS, QUE., Aug. 25, 1904.

DEAR SIR,—In reply to yours of 22nd asking for further information for Auditor General, as to item of claim for hand-picked boulder stone in crib-filling, beg to say: That engineer in charge, ordered that selected stone be placed in cribs before material from outside shoal as per clause 7 and 23 of specification was used.

In order to procure this stone, we had to place men gathering it from farm land and picking it out from excavation by dredge and place on flat scows, this hauling from farm and selecting from dredge material, increased the cost of filling and caused this stone to be handled several times before placing in cribs.

Although the material from shoal consisted of boulders, gravel and clay, and was approved of for such filling, the engineer in charge considered that more stone should be procured and placed in crib when sinking to avoid any danger from scour or action of the current.

Trusting that this explanation will be satisfactory.

I am, sir, your obedient servant,

The Deputy Minister, Railways and Canals. RANDOLPH MACDONALD.

Extract from Order in Council, September 20, 1904.

On a memorandum dated August 17, 1904, from the Minister of Railways and Canals representing that certain items of extra work have been executed by Messrs. Manning and Macdonald, contractors for section 13 of the Soulanges canal, for which work it does not appear that orders fixing prices were given in writing, nor that claims in respect of such extra work have been repeatedly presented by the contractors, as required by the terms of the contract.

The Minister further represents that the items in question have been carefully gone over by the Chief Engineer of the Department of Railways and Canals, with the Chief Assistant of the late Superintending Engineer of the canal, who with the contractors themselves, explained to him the circumstances attending the execution of the work in question and he has reported himself as being satisfied that the extra work is such as should have been performed, and that the prices fixed therefor are fair and just. The aggregate of these extra items amounts to $34,182.52 as per list hereto attached.

The Minister recommends that authority be given for the waiver of the requirements of the contract dated September 24, 1892 (originally made with Randolph Macdonald, to which contract Mr. A. Manning was afterwards admitted, the firm becoming Manning & Macdonald), in so far only as they call for an order in writing by the Engineer for extra work together with waiver of all requirements of the contract calling for the repeated presentation of claims by the contractors.

The Committee submit the same for approval.—JOHN J. MCGEE, *C.P.C.*

AUDIT OFFICE, OTTAWA, September 22, 1904.

SIR,—Let me offer the following remarks in further discussion of Manning & Macdonald's revised final estimate on section 13 of the Soulanges canal.

The present application for $34,182.52 is for extra work, as detailed below :—

1.	Excavation in foundation of railway bridge..	$ 572 34
4.	Rock below grade, east of lock..	2,955 60
5.	Rock below grade, west of lock..	2,626 80
8.	Stone delivered for backing, not used..	4,165 00
10.	Railway bridge, additional masonry..	1,726 00
11.	Pivot pier, increase in circular ashlar..	232 00
15.	Masonry arches, end of raceway..	204 35
16.	Coping of raceway slope walls..	515 50
17.	Stone filling in rear of walls..	14,271 00
18.	Boulder stone in cribs..	2,189 60
19.	Dry masonry in rear of slope walls..	300 00
23.	Unwatering for additional weir masonry..	1,224 00
25.	Temporary bridge, sections 12 and 13..	23 48
30.	Removing crib No. 2, south..	2,939 40
31.	Labour for waste channel..	112 65
32.	Cutting checks for weir sluices..	124 80
		$34,182 52

The claims, as made by Messrs. Manning & Macdonald, amounted to $161,096.95. Of this total, $46,579.54 has been allowed by you, namely: $12,397.02 dated August 11, 1903, which was paid in Estimate No. 78, and $34,182.52 dated December 23, 1903, which forms the subject of the Application now in hand.

The information supplied to this office consists: 1st, of the contractors' explanations, as presented along with the claims; 2nd. Engineer A. J. Grant's comments and reports thereon, dated August, 1903, and 3rd. some memoranda from Engineers Monro, Allison and Pinhey.

Your rulings of August 11, 1903, rejecting most of the $34,182.52 allowed December 23, 1903, appear to be based on the facts given by Engineer Grant in his report of August, 1903; but the papers sent to me do not contain any of the reasons or arguments which caused you to make the allowances of December 23, 1903, on items previously refused by yourself.

In discussing the present application, therefore, I am forced to rely on Mr. Grant's report of August, 1903, which is very unfavourable to a large number of the items now allowed by you.

1.—Excavation in foundation of Railway Bridge, $752.34.

This allowance for excavation to extra depth and width is calculated thus :—

Deepening below elevation 144 : 1,779 cubic yards at 60 cents instead of 27 cents..	$ 587 07
Widening above elevation 144 : 2,543 cubic yards at 60 cents instead of 27 cents..	839 19
	$1,426 26
Less, allowed in Estimate No. 78..	853 92
	$ 572 34

Mr. Grant remarks on this claim (at page 101) :—'The contractors are fairly entitled to some additional compensation for the excavation below elevation 144, but to none for the widening above that level, which would cost no more, or probably less

than the quantity required to be excavated if the piers had been founded as at first contemplated.'

If the Assistant and Chief Engineers conflicted on the same information, the latter's judgment would of course prevail. But this seems to be a case where the comparative difficulty of the widening excavation would naturally be determined by the local officer who stood over the work, and saw it done. Has Mr. Grant modified his report of August, 1903, in this particular ?

4, 5.—Rock below Grade, part of Bottom Layer.

Mr. Grant says (page 104) that it was well understood during the progress of the work that the spirit and intention of the specification forbade the payment of excavation below the grade line of the canal bottom; that no measurements for such excavation were ever taken between stations 720 and 738; and that no claim was ever made for rock below grade between these stations during the progress of the work. He admits that the matter may be one of interpretation.

If the claim was not made and kept in sight since the work was done it is shut out by clause 27 of the contract.

The whole difficulty would have been avoided if the specification had been as clear as that in Larkin & Sangster's contract, No. 13,945, namely: 'In all material the bottom of the canal when completed shall be a plane 14·50 feet above datum. No payments will be made for excavating below this level.'

8.—Stone delivered for Backing, but not used, $4,165.

The allowance made by you under date of December 15, 1903, is for 1,190 yards at $3.50, or $4,165. The contractors claimed $16,318.

At page 108, Engineer Grant reports: 'The chief, and in fact the only reason that part of the Coteau du Lac stone was left piled on the section after the completion of the works is that after April, 1896, a large quantity (22,000 cubic yards) of rock was excavated in the canal bottom on section 13, a great part of which the contractors quarried for backing, &c., and used in the construction of the walls, as being more convenient and economical to handle than the Coteau du Lac stone piled in the adjoining fields. If no rock excavation had been discovered on the section the contractors would not only have used all the stone delivered at the end of April, 1896, but many thousands of cubic yards more, which would have had to be brought on the works from other places at greater cost than what it cost to quarry and use the rock excavation of the section. It therefore appears to me (Mr. Grant) that this claim should not be entertained, as the stone found on the section was the property of the government, and the contractors were merely allowed to use it in lieu of their own stone from Coteau du Lac, which was left piled in the field north of the guard lock, of which no measurement was made on completion of the works.'

I have not been able to see any flaw in Mr. Grant's logic. Had the contractors not received the privilege of using the canal-bottom stone (which they were paid for excavating) they would have been put to more expense for Coteau du Lac stone instead of less. They should therefore be thankful for what they got, instead of trying to make the gift a basis for a new claim to be paid for diminished work.

This anomaly need not have arisen if the practice were followed of charging the contractors a fair price for any government property which they wished to take. It would then probably have paid them to use up the Coteau du Lac stone before buying the canal-bottom stone, and there would have been no foundation for the present claim.

Has Mr. Grant withdrawn any of the facts so clearly described by him in the above quotation?

16.—Cut stone Copings for Retaining Walls, $515.50.

The allowance here is for 103.1 cubic yards at $10 instead of at $5.

Section 80 of the specification describes 'Pitching of sides of raceway,' and ends with these particulars of the coping therefor: 'The top line on both sides to be finished with a roughly dressed coping 1½ feet wide, and in lengths of not less than 3 feet, laid perfectly throughout and well jointed.' This service appears in item 20 of the schedule as 'Stone pitching of slopes of raceway, paragraphs 64 and 80, $4 per cubic yard.' The final estimate, however, contains no entry under this item of the schedule, and the pitching appears to have been discarded in favour of random-coursed masonry.

Section 38 of the specification describes 'Random-coursed masonry walls,' and orders coping thus: 'Coping stones must be uniformly 15 inches throughout, and 3 feet wide on top. They are to be of gray limestone, dressed joints, kept full, and be in lengths of not less than 3½ feet wide. They shall conform to the batters of the wall, and have a nosing on the front edge as shown on the plan.' Item 18 of the schedule is 'Random-coursed masonry in retaining walls, or wherever required, $5 per cubic yard.' Item 19 is 'Cut-stone copings for retaining walls, $15 per cubic yard.'

The question of the rate to be paid for the coping is not (I think) to be settled by the nature of the wall which it caps, but by the nature of the coping itself; and here Mr. Grant is very explicit. He says (page 118): 'For a section of the slope wall or pitching as built, see plan No. 7 in the Cross-section book; the coping shown on the wall is that described in the specification, and is roughly picked to a smooth surface on the front and top faces, with full end joints, and is mostly 15 inches thick, due to the fact that the quarry afforded abundance of stone suitable for coping dressed to that thickness. It is an entirely different class of work to that required for finely boucharded copings 3 feet wide, that the retaining walls of the entrance piers, &c., are finished with. The contractors' plea that it should be returned under item 19 at $15 per cubic yard is too absurd to be entertained.'

Unless Mr. Grant has withdrawn these statements of fact, I do not see how his superior local knowledge can be disregarded.

17.—Selected material behind walls, $14,271.

The allowance under date of Dec., 1903, for this service is 28,542 cubic yards at 50 cents.

The contractors claim (at page 63) that all filling behind walls or other structures, as provided for by paragraph 74 of the specifications, should have been included in the item (No. 23 of the contract) for stone filling behind walls,—and that this has not been done by the department. The contractors quote paragraph 74 of the specification as follows: "The filling-in behind all masonry walls or other structures shall be executed with broken stone, quarry-waste, or other selected material arising from the excavations, placed in layers and well rammed or otherwise compacted from bottom to top and to the entire satisfaction of the inspector or person in charge. The refuse or stone for this purpose shall be taken from any part of section 13 which may be pointed out. No claim for extra haul on this account will be allowed.'

Mr. Grant (at page 119) discusses the claim thus: 'The stone filling and other selected material paid for under item 23 of the schedule attached to the contract is (for the purpose of explanation) divided into 3 parts: (1) All the filling not otherwise paid for in rear of the south wall of the lock and its extension walls for bridges; (2) The stone-filling, varying from 2 to 4 feet, in width, placed in rear of the retaining walls forming the entrance pier and splay walls leading up to the end of the lock; (3) A small cross section of 54 square feet area of selected material placed in layers in rear of the concrete walls on the crib work of the entrance piers. All other filling in rear of the masonry walls is composed of all classes of material arising from the excavation

on the section, and was dumped in place from cars, wagons or carts, without any other labour spent on leveling it down, other than what would be necessary to keep the tip-end of any high bank flattened out. Payment for this large quantity is now demanded at the contract schedule rate of 50 cents per cubic yard, no work on which was carried out according to paragraph 74 and 23 of the specifications. The claims should therefore not be allowed.'

Three paragraphs of the specification (quoted below) appear to bear particularly on this subject. (74): 'The filling-in behind walls shall be executed with broken stone, quarry waste, or other selected material arising from the excavations, placed in layers and well rammed or otherwise compacted from bottom to top.' (10): The prices bid for "dredging" and "earth excavation" must include the cost of hauling any proportion of the excavation from any part of section 13 to any other part thereof, either for the purpose of filling at the entrance, throwing the stuff to spoil, or for any other object connected with the works. Schedule item 23: 'Stone filling behind walls, paragraph 74, 50 cents per cubic yard.'

Schedule item 23 provides 50 cents a yard for the stone filling, and this has been paid in the progress estimates; leaving the earth filling to be covered by section 10, as paid for by the excavation rate; at least such would be my interpretation.

The engineers have applied the 50 cents a yard to the 'selected earth' also, of which there was a limited amount; this may or may not have been a matter of equity. But I do not see how either equity or interpretation can require pay for the rest of the filling, if it was (as Mr. Grant says) composed of all classes of material, dumped from cars, wagons or carts, without any labour spent on leveling it down,'—when such work is explicitly exempted from charge by section 10.

Has Mr. Grant withdrawn any of the facts stated by him concerning this subject?

18.—Hand-picked Boulder-stone for Crib filling, $2,189.60.

This allowance is to pay for 5,474 cubic yards of crib-filling, at 80 cents a yard, instead of the 40 cents already paid under the contract.

The contractors' claim (page 65) reads thus: 'Hand-picked boulder-stone was placed in the cribs at the upper entrance by order of the engineer in charge, and such filling was more expensive than called for by the specification. Stone was placed on platforms on top of cribs to sink them and hold them in position before material taken from outside shoal was placed therein. The engineer required that stone should be placed inside the crib before material from outside shoal was placed therein. Crib-filling under our contract as per clauses 7 and 23 of specification, shall consist of approved material arising from either the dredging of the outside shoal, the entrance channel, or excavation of the section. The material from the shoal consisted of boulders, gravel and clay, and was approved of for such filling. We consider that the filling of hand-picked boulder-stone was not necessary, nor is it called for either in our contract or tender, and was not contemplated at that time.'

On September 4, 1894 (page 151), Engineer J. L. Allison reported as follows: 'I do not understand this claim. No orders about hand-picked stone were ever given by me. The only restrictions made by me as to the nature of the material to be used for filling was that it should not contain an excess of clay, nor stones of great size. Before the dredging of the shoal was commenced, I ordered stones to be put in the cribs to hold them down, because that was the only material that the contractor had on hand, or that he proposed using at the time. Since the dredging of the shoal was begun, I have never said any thing about stones being taken to the cribs, except for the purpose of loading the platforms. So far as any orders of mine are concerned, there was nothing to hinder the contractor from taking the stone off of one crib and using it to sink another, provided a sufficient weight was put in the crib before the platforms were unloaded. The crib-filling has all been returned at the contract rates.'

On November 24, 1900 (page 143), Engineer Allison reported again: 'The stone loaded on the platforms in sinking the cribs was, after the cribs were partly filled,

thrown into the cribs. I always understood that this was done as the easiest way of getting it out of the way. The stone came from the excavation on the section. The contractor was free to preserve the stone in any way he saw fit, in order to use it again in sinking other cribs. I remember telling Mr. Aylmer so. There is no reason whatever for considering payment of this claim.'

At page 140, Engineer A. J. Grant reports, under date of November 26, 1900: 'Crib No. 2 A was the only crib built under my supervision, and was sunk in place in the usual way by being loaded with rock arising from the excavation on the section. As this was the last crib built, there never was any question as to the disposal of the rock after the crib was partially filled, other than to put it out of the way in the quickest and easiest manner possible, which was to throw it into the crib. Unless there is further evidence to the contrary, there appears to be no reason for considering payment of this claim.'

At page 147, after quoting Mr. Allison's remarks, Superintending Engineer Monro proceeds: 'Clause 23 of the specification says that the cribs shall be sunk either by placing a sufficient number of old iron rails on top, or by the adoption of such other means as may be approved by the engineer. This is a trumped-up claim, and has no real foundation whatever. The contractor was free to use either hand-picked rails or stone. He wisely chose the latter, because, as stated, they helped to fill the cribs after being used to sink them. They were already paid for as excavation on section.'

Gathering up all the facts mentioned by the different engineers: The crib platforms were loaded with stone instead of iron, because the contractors preferred to use the stone; and after the cribs were partly filled with dredged material, the loading-stones were thrown into the cribs, as being easier than carrying them away. Not only is there no extra work to pay for, but the specification itself (section 23) does not seem to have been satisfactorily observed; as nothing is said by the engineers (in their very full explanations) to indicate that the ballast 'was placed and packed around the ties so as to ensure solid filling throughout.' The dredged material appears to have been dumped in loosely. Please have inquiries made about this.

General Remarks.

Under section 5 of the contract, a condition precedent to the right of a contractor to be paid for extra work is, that he must get a written order from the engineer, fixing the price, before the work is begun.

Also, under section 27, the contractor has no claim for payment for extra work, unless he has made repeated demands for settlement since the work was done, in the manner described in the contract.

Until these requirements are waived by a competent authority, the application cannot be passed, whether the other difficulties are removed or not.

I am, sir, your obedient servant,

The Deputy Minister, Railways and Canals. J. L. McDOUGALL, *A.G.*

AUDIT OFFICE, OTTAWA, Sept. 29, 1904.

SIR,—There has just been received at this office a copy of an Order in Council in favour of Manning & Macdonald, waiving two of the contract restrictions which prevented payment of their claims for extra work on section 13 of the Soulanges canal.

Please describe whatever progress has been made towards preparing an answer to the Auditor General's letter of Sept. 22. When may that answer be expected here ?

I am, sir, your obedient servant,

The Deputy Minister, Railways & Canals. FREDERICK HAYTER, *for A.G.*

RAILWAYS AND CANALS DEPT., OTTAWA, Oct. 12, 1904.

SIR,—I have the honour to acknowledge the receipt of your communication of the 29th ultimo, with further reference to your letter of the 22nd ultimo, relative to Messrs. Manning & Macdonald's revised final estimate on section No. 13 of the Soulanges canal.

In reply, I have to say that my reasons for allowing the claims, aggregating the sum of $34,182.52, referred to in your said letter, were that, after carefully going over the items in question with the chief assistant engineer of the canal, and the contractors, who explained to me the circumstances attending the execution of the work, I satisfied myself that the work was performed; that it was justly an extra work, and that the prices charged therefor were fair and just.

I am, sir, your obedient servant,

The Auditor General. COLLINGWOOD SCHREIBER, *D.M., R. & C.*

AUDIT OFFICE, OTTAWA, Oct. 19, 1904.

SIR,—Let me acknowledge receipt of your letter No. 135654 concerning the claims of Manning & Macdonald for extra work on section 13 of the Soulanges canal, in which letter you state that, after carefully going over the items in question with the chief assistant engineer of the canal, and the contractors, who explained to you the circumstances of the work, you satisfied yourself that the work was performed, that it was justly an extra work, and the prices charged therefor were fair and just.

Your letter of Aug. 15 on the same subject said: 'I went most carefully into these matters with Mr. A. J. Grant, the late Mr. Monro's chief assistant, who, together with the contractor, explained all the circumstances attending the execution of these works, and proved to my satisfaction that they were proper charges, and that the prices are fair and just. I herewith inclose the papers in this connection, as requested.'

My letter of Sept. 22 (eleven pages) was a discussion of the papers referred to in the last paragraph; and I showed you, by quotations from the reports of Messrs. Monro, Allison & Grant (especially Mr. Grant) that the local engineers thought that most of the allowances should not be made; many of their reasons being statements of facts within their own personal observation, which cannot be gainsaid by departmental officers who have not the same local knowledge.

These adverse reports of the local engineers are the last papers on the file: there is nothing to show that they have withdrawn their statements of facts. As pointed out in my letter of Sept. 22: if the assistant and chief engineers conflicted on the same information, the latter's judgment would of course prevail; but not so in cases where the facts would naturally be determined by the local officer who stood over the work and saw it done. In these cases, it must be shown that the local officer was mistaken, before his first report can be disregarded; and if possible, his admission of error should be on record, with his explanation thereof.

Similarly it will be necessary, I think, to have (item by item) your new reasons for each allowance made on December 23, 1903, for services which you rejected in a previous formal award on August 11, 1903.

Please, therefore, take up again my letter of Sept. 22, and discuss each item separately on its merits, along the lines there indicated.

I am, sir, your obedient servant,

The Deputy Minister, Railways and Canals. J. L. McDOUGALL, *A.G.*

AUDIT OFFICE, OTTAWA, December 6, 1904.

DEAR MR. BELCOURT,—Let me acknowledge receipt of your note of December 3, concerning the accounts of Messrs. Manning & Macdonald for work on section 13 of the Soulanges canal.

I do not find that much can be done by this office to advance the settlement of the contract in question.

The real difficulty, as will appear from the correspondence with the department, is that we have arrived at a deadlock.

The local engineer, Mr. A. J. Grant, who is personally familiar with all the items and history of the work, has reported definitely and decidedly against the greater portion of the claim, with detailed statements of the information on which he bases his adverse certificates.

The Chief Engineer, Mr. Schreiber, after hearing the contractors and Mr. Grant, gave judgments in favour of Messrs. Manning & Macdonald, without recording the reasons why Mr. Grant's objections or facts appeared to him incorrect.

Had Mr. Schreiber preserved these reasons, and sent them to this office, they might possibly have enabled me to give less weight to Mr. Grant's statements of facts.

In the absence of Mr. Schreiber's reasons, I have no option but to rely on Mr. Grant, as being the local officer in charge of the service, and therefore the most qualified to report on all questions concerning actual occurrences.

I am, sir, your obedient servant,

Hon. N. A. Belcourt, M.P., Ottawa, Ont. J. L. McDOUGALL, *A.G.*

Railways and Canals Dept., Ottawa, Dec. 12, 1904.

Sir,—I have the honour to acknowledge the receipt of your communication of the 7th instant, with which you transmit, for my information, a copy of a letter addressed by you to the Hon. N. A. Belcourt, M.P., on the 6th instant, relative to the claim of Messrs. Manning & Macdonald arising out of their contract for section No. 13, on the Soulanges canal.

In reply, I have to say that I have already given you all the explanation in my power to give, and cannot, therefore, add anything further towards the clearing up of the difficulty you appear to experience in dealing with the matter.

I am, sir, your obedient servant,

The Auditor General. L. K. JONES, *Secretary.*

Railways and Canals, Ottawa, December 23, 1904.

Sir,—Representation has been made to the department by Messrs. Belcourt & Ritchie, solicitors for Messrs. Manning & Macdonald, contractors for section No. 13 of the Soulanges canal, that you have refused to pay the amount of the certificate that has been issued by the Chief Engineer of the department in their favour in regard of work done, &c., under their said contract.

As no such intimation has been received by the department from you, I have to request that you will be pleased to state whether or not this allegation is correct.

I am, sir, your obedient servant,

The Auditor General. COLLINGWOOD SCHREIBER, *D.M. R. & C.*

Newspapers Charged in Travelling Expenses.

Audit Office, Ottawa, September 9, 1904.

Sir,—In the travelling expense accounts of employees of your department for the year 1903-04, I find the following charges for newspapers:—

G. A. Bell	$ 0 70
R. C. Douglas	2 36
H. H. Hansard	0 55
E. V. Johnson	7 45
L. K. Jones	0 58
W. L. Leslie	0 50
W. C. Little	0 20
G. A. Mothersill	10 75
A. H. McKee	0 20
C. W. Ross	0 15
L. Shannon	1 54
T. L. Simmons	3 85
	$28 83

Unless the newspapers were necessary for the proper performance of the public duties on which these officers were engaged (which does not seem probable), the amounts above shown should be refunded. Please have this done at an early date.

I am, sir, your obedient servant,

The Deputy Minister, Railways and Canals. J. L. McDOUGALL, *A.G.*

RAILWAYS AND CANALS, OTTAWA, October 15, 1904.

SIR,—I have the honour to acknowledge the receipt of your communication of the 9th ultimo, relative to the charges for newspapers that have been made by certain employees of this department in their travelling expense accounts for the year 1903-04, in which you state that, unless the newspapers were necessary for the proper performance of the public duties on which these officers were engaged, the amounts in question should be refunded.

In reply, I have the honour to inclose herewith, for your information, memoranda from the officers mentioned in your letter, relative to the charges referred to.

I am, sir, your obedient servant,

The Auditor General. COLLINGWOOD SCHREIBER, *D.M., R. & C.*

RAILWAYS AND CANALS DEPT., OTTAWA, September 10, 1904.

DEAR SIR,—Having been asked by you for an explanation requested by the Auditor General as to certain charges made by us for newspapers in our several accounts rendered against the department for travelling expenses when on departmental business, we may state that we are regular yearly subscribers to newspapers at Ottawa, which papers are delivered daily at our residences in Ottawa.

In travelling we are deprived of the use of these papers. We consider that newspapers are a necessity, and that our charges therefor are reasonable and legitimate, and incident to our duties and expenses when required to travel upon public business.

We are, sir, your obedient servants,

ROBERT C. DOUGLAS, *Hydraulic Engineer.*
H. H. HANSARD, *Law Clerk.*

The Deputy Minister, Railways and Canals.

NOTE.—Similar remarks were made by the other gentlemen.

Patented Appliances Bought Without Tender.

AUDIT OFFICE, OTTAWA, June 4, 1904.

SIR,—Let me acknowledge receipt of your application No. 489 for $9,000 in favour of E. A. Manny, of Beauharnois, for ten sets of patented 'Lock-gate appliances' delivered on the Lachine canal, at $900 each.

It is proposed to charge this payment to the special vote for 'Lachine canal, capital : Lock-gate protection.'

Please inform me whether these appliances have been attached to the lock-gates, and whether they have been found protective, as demanded implicitly by the vote-description 'Lock-gate protection.'

The contract form is marked 'This is a patent appliance; tenders not needed; L. K. Jones.' The voucher is certified 'Prices fair and just, Collingwood Schreiber.' Please let me know how the price was determined, since there is no public competition to fix a market rate.

I am, sir, your obedient servant,

The Deputy Minister, Railways and Canals. J. L. McDOUGALL, *A.G.*

RAILWAYS AND CANALS DEPT., OTTAWA, June 7, 1904.

SIR,—I have the honour to acknowledge the receipt of your communication of the 4th instant, relative to the application that has been made to you by the department for the issue of a cheque in favour of Mr. E. A. Manny for the sum of $9,000, being for ten sets of patent lock-gate protection appliances furnished by him for the Lachine canal, in which you ask if the appliances have been attached to the lock-gates, whether they have been found protective, and how the price was determined, as there was no public competition to fix a market rate.

In reply, I have to say that the said appliances were tested during a period of two years on the Beauharnois canal, with the result that they were found to work well, and to be of great service. The price for them was established by an offer made, in detail, by Mr. Manny, which price was checked by the superintending engineer of the canal, are found to be fair price and reasonable. From my own personal knowledge of such work, I am also of the opinion that the rate is fair.

I am, sir, your obedient servant,

COLLINGWOOD SCHREIBER,

The Auditor General. *D. M., R. and C.*

AUDIT OFFICE, OTTAWA, June 16, 1904.

SIR,—Let me acknowledge receipt of your 195946-1452 of June 7, concerning the claim of E. A. Manny for $9,000, to pay for lock-gate protection appliances for the Lachine canal.

In my letter of June 4, asking 'whether these appliances have been attached to the lock-gates,' I meant 'attached to the lock-gates of the Lachine canal.' Please inform me on this point.

It has been mentioned to me by a prominent citizen of Montreal that the lock-gates cannot be worked satisfactorily with these Manny appliances, until a large amount of stone-cutting is done in the walls, to enable the gates to be fully opened; and that the forwarders are strongly opposed to their use. Have these facts yet been brought to your notice ?

Since my first letter of June, it has been pointed out to me that the statute does not in words permit the passing of a certificate on account of work of this magnitude

without tenders having been called for if urgency was not shown. I have asked for legal advice and expect to get it to-day. The fact of this work having been done under a patent seems important, but we shall see.

I am, sir, your obedient servant,

The Deputy Minister, Railways & Canals. J. L. McDOUGALL, *A. G.*

RAILWAYS AND CANALS DEPT., OTTAWA, June 11, 1904.

SIR,—I have to acknowledge the receipt of your letter of 16th instant, with regard to the desired payment to Mr. E. A. Manny for lock-gate protection appliances for the Lachine canal, in which you intimate that you have been informed by a citizen of Montreal that a large amount of stone-cutting in the walls will be required to be done to enable the gates to be opened, and that the forwarders are strongly opposed to their use.

In reply, I have to state that you have been misinformed in regard of the amount of masonry work required to be done, and, further, that if objection has been raised by the forwarders to the use of these appliances, I can only say that their objection is without justification.

I am, sir, your obedient servant,

The Auditor General. COLLINGWOOD SCHREIBER, *D.M., R. & C.*

NOTE JUNE 17.—Mr. Schreiber telephones that the appliances have not yet been attached, but that the canal employees are in the act of attaching them.—*F. Hayter.*

AUDIT OFFICE, OTTAWA, June 17, 1904.

SIR,—Let me call attention to sections 11 and 12 of the Railways and Canals Department Act, in the Revised Statutes of Canada.

It is there provided that the minister shall invite tenders, by public advertisement, for the execution of all works, except in cases of pressing emergency, in which delay would be injurious to the public interest, or in which, from the nature of the work, it can be more expeditiously and economically executed by the officers and servants of the minister.

A case has just arisen, where the inventor of a patented lock-gate appliance has supplied $9,000 of his goods to the Lachine canal. They can be obtained from no one else, and the government is probably the only consumer.

Did section eleven, above quoted, demand either that tenders should be advertised for, or that the work should be certified as pressingly emergent ?

Are these requirements set aside by the fact that the article is patented, and can be obtained only from the inventor ?

I am, sir, your obedient servant,

A. B. AYLESWORTH, Esq., K.C., Toronto. J. L. McDOUGALL, *A.G.*

TORONTO, June 20, 1904.

DEAR SIR,—I have your letters of 17th and 18th instant. You refer me to sections 11 and 12 of the Act respecting the Department of Railways and Canals, and tell me a case has arisen where the inventor of a patented lock gate appliance has supplied such articles for the Lachine canal, that these patented lock gate appliances can be obtained from no one else, and that the government is probably the only customer.

You ask my opinion whether section 11, above referred to, requires either that

tenders should be advertised for, or that the case should be certified as of pressing emergency.

I should not consider these sections 11 and 12 as having application at all to a case of this character.

I would think the patent lock gate appliance you speak of simply a commodity, to be purchased by the department when wanted, exactly as any other appliance for public service would have to be obtained when needed.

You will observe that sections 11 and 12 to which you refer relate entirely to 'the execution of works'. Each section is, from its language throughout, applicable plainly to the doing of public works, and there is in my opinion a very wide distinction between the executing of a public work and the purchase of some article which is needed in the public service. The very circumstance that the lock gate appliance in question has been made the subject of a patent seems to me to demonstrate that the manufacture of it is a thing entirely different from the executing of a public work such as these sections 11 and 12 contemplate. In my opinion these sections have no application whatever to the case of purchasing a patented article such as your letter speaks of, and I am therefore of opinion that it was not necessary, in such a case, either to advertise for tenders, or that the work should be certified as of pressing emergency.

I may further point out that where, as in this case, the article is patented, so that a monopoly in its manufacture is created by law, it would seem simply a waste of public money to advertise for tenders for its supply. Such tenders could come only from the patentee, and in the nature of things could be little else than a copy of his price list.

Yours truly,

The Auditor General. A. B. AYLESWORTH.

Cheque-signatures for Acceptance by Banks.

AUDIT OFFICE, OTTAWA, August 3, 1904.

SIR,—In connection with the recently introduced system of paying employees of the Intercolonial Railway by cheque, we beg to advise you that the following persons have been authorized by Order in Council of July 23, to sign and countersign cheques for the General Manager and Chief Accountant and Treasurer.

For General Manager.	*For Accountant.*
Thos. Williams,	C. W. Burnyeat,
F. J. O'Rourke,	J. W. Forbes,
C. B. Trites,	G. H. Seaman.
W. H. Fillmore,	
H. F. Hamilton,	
J. C. Stewart,	
E. E. Ayer,	
F. E. Lockhart.	

We have the honour to be, sir,
Your obedient servants,
J. L. McDOUGALL, *A.G.*
* * * * * *Dy. M. of F.*

W. J. ANDERSON, Esq.
Manager, Bank of Montreal, Ottawa.

FINANCE DEPARTMENT, OTTAWA, August 5, 1904.

SIR,—Referring to the draft letter of the 3rd instant sent me for joint signature, addressed the Bank of Montreal, Ottawa, respecting the signing of letter of credit cheques for payment of the employees of the Intercolonial Railway, I have the honour

to state that I do not consider that the procedure adopted in the draft letter complies with the terms of the Order in Council of June 27, 1888, a copy of which you will find on page A. 6 of your report of last year.

Section 1 of the Order as on page A. 6 provides:—

'That for each department substitutes be authorized by Order in Council to sign for those in whose favour the letter of credit is drawn, and that a copy of the Order in Council be sent to the Bank of Montreal, or other bank on which the credit may be drawn.'

The Department of Railways and Canals who has charge of the service should forward a copy of the Order in Council of July 23 last (of which I have not yet received a copy) to the Bank of Montreal, with specimen signatures of those to whomauthority is given to sign as substitutes.

Draft letter returned.

I am, sir, your obedient servant,

The Auditor General. J. M. COURTNEY, *D. M. F.*

AUDIT OFFICE, OTTAWA, August 8, 1904.

SIR,—I have your letter of the 5th instant with regard to the authorization of the bank to receive, instead of the names of the persons in whose favour a departmental credit is issued, such substitutes as Council may provide.

You and I jointly authorize the Bank of Montreal, or any other bank, to honour departmental letter of credit cheques, or in fact, any letter of credit cheques. You cannot do it alone. I cannot do it alone. No other person has any authority, no matter who he is, to empower the bank to cash a letter of credit cheque. The Order in Council, if shown to the bank, would not justify the bank in taking the signatures of the persons who are authorized. We alone can do that. As a mere matter of practice, it would never do for the bank, of its own motion, to receive anything but what we send it.

What is proposed to be done now has always been the practice. If any change is made, besides transgressing the law, as I view it, we would be getting into inextricable confusion.

It seems to me only necessary to draw your attention to this subject, without entering fully into it; but if you do not see the force of my contention, I shall be glad to go further into the matter with you.

A person although appointed to do a certain thing, has no authority whatever to appoint his substitute to do it.

My recollection is that I have dealt with this subject before within the past year, but in the meantime I do not see my letter, and I am anxious that the matter should not be delayed, because I want to get the officials at Moncton into the way of issuing cheques for the payment of salaries wherever banks are within easy reach.

Speaking of your not having the Order in Council, I would suggest what probably occurs to yourself, that you should apply to the clerk of the council to send you these Orders in Council whenever they are passed.

To my mind the clear intention of the law is that you act for the government as a body, and that I act as the agent of parliament.

I am, sir, your obedient servant,

The Deputy Minister of Finance. J. L. McDOUGALL, *A.G.*

FINANCE DEPARTMENT, OTTAWA, August 13, 1904.

SIR,—I have the honour to acknowledge the receipt of your letter of the 8th instant on the subject of authorizing the bank to accept the signatures of substitutes on letter of credit cheques, which shall receive attention.

I am, sir, your obedient servant,

The Auditor General. J. M. COURTNEY, *D.M.F.*

AUDIT OFFICE, OTTAWA, Sept. 1, 1904.

SIR,—Let me call your attention to my letter of the 8th ultimo on the subject of authorizing the bank to accept the signatures of substitutes on letter of credit cheques.

On the 13th ultimo you acknowledged its receipt but I have had nothing further from you on the subject.

I am, sir, your obedient servant,

The Deputy Minister, Finance Department. J. L. McDOUGALL, *A.G.*

FINANCE DEPARTMENT, OTTAWA, Sept. 8, 1904.

SIR,—Referring to your letter of the 1st instant, on the subject of letter of credit cheques I have the honour to say that I believe the provisions of the Order in Council of June 27, 1888, have been carried out in the particular case which gave rise to the correspondence.

I am, sir, your obedient servant,

The Auditor General. J. M. COURTNEY, *D.M.F.*

AUDIT OFFICE, OTTAWA, November 10, 1904.

SIR,—In further discussion of the substitutes proposed for Messrs. Pottinger and Williams, to sign cheques for Intercolonial Railway wages:

It might perhaps meet the wishes of all, if the bank were notified by us separately.

I would be pleased to learn whether you have notified the bank that the new substitutes (as named in the present instance) may be accepted, as far as you are concerned. I shall thereupon send a similar notification on behalf of this office.

I should be glad to have it understood that there is to be some fixed manner of acting in this regard for the future.

I am, sir, your obedient servant,

The Deputy Minister, Finance Department. J. L. McDOUGALL, *A.G.*

FINANCE DEPT., OTTAWA, November 11, 1904.

SIR,—I have the honour to acknowledge the receipt of your letter of the 10th instant on the subject of the letter of credit cheques for the wages of the Intercolonial Railway employees.

As stated in my letter to you of September 8 last, I believe the terms of the Order in Council governing the matter have been fully complied with.

Under my direction, and with my approval, a copy of the Order in Council authorized by this section, although the cheques are usually smaller in amount than specimens of the signatures themselves, was sent to the bank of Montreal, Ottawa.

With regard to the concluding paragraph of your letter, I can only say that this department will endeavour to strictly comply with the terms of the law and the regulations governing this matter.

I am, sir, your obedient servant,

The Auditor General. J. M. COURTNEY, *D.M.F.*

AUDIT OFFICE, OTTAWA, November 29, 1904.

DEAR MR. AYLESWORTH,—A difference is just now arising with reference to proceedings under section 30 of the Audit Act (chap. 29, revised statutes).

By far the greater number of Dominion cheques are made by the machinery authorized by this section although the cheques are usually smaller in amount than those issued directly against the Receiver General's accounts. Last year the grand totals in the respective cases were $42,000,000 and $22,000,000, with some amounts not easily classed as belonging to either.

The credits are generally given to the Deputy Minister and the Accountant of the department jointly, neither being able to use the credit without the co-operation of the other. The letter of authorization to the bank (usually the Bank of Montreal at Ottawa) has hitherto been signed invariably by the Deputy Minister of Finance and the Auditor General. There is nothing in section 30 which directly draws attention to the requirement of having this letter signed by the Auditor General.

However, the credit would, as was supposed by me, be not good unless it had been issued with the approval of the Auditor General. A credit I thought would not be good unless it was authorized. The bank should have the information from the officials, which showed on the face of it that the credit was regularly given. This double signature gave it this character and besides the credit was signed by two persons, which in every thing connected with money is simple and effective. Each of two men may be great rascals, but they may work together for a life time and not know it, if their business connections extend to nothing beyond their public duty of signing together public cheques, or other similar documents affecting government money.

It has been found necessary for almost every credit to have substitute signatures for both the deputy head and accountant, that is, really to have one or more other credits. The substitute signatures are the subjects of Orders in Council; not, as I contend, that the authorization to draw money from the government bank comes from the Orders in Council; but that I am authorized by the Orders in Council to apply for credits to them, on the application from the respective departments in their favour.

Now Mr. J. M. Courtney, the Deputy Minister of Finance, refuses to take part with me in notifying the bank that the persons who have been authorized as substitutes may be accepted in the signing of letter-of-credit cheques, thus maintaining virtually that those who come into the transaction after the credit was issued have then power given to them, it being from a different source from that which gave the credit in the first instance . Therefore, if there was any difficulty in showing to the auditor that certain persons in the departments might be safely and properly intrusted with a credit, the power would be regularly given to the same effect by first applying for a credit, in favour of those in whom the auditor had confidence, and then transferring all the power desired to untrusted persons by the means of substitutes.

You will undestand that as required by section 30 a statement of cheques drawn during a month comes to this office during the early part of the following month, and that without waiting for the vouchers on which the cheques have been issued this office causes the bank to be repaid. It may turn out sometime that whether by design or not a cheque has been issued to some person to whom nothing was due or in excess of what was due. I feel that if I have applied for the issue of the credit or taken part in it the country is responsible for the cheque which on the face of it only, is regular, but would not be so if the credit had not in this, the only authorized respect been regularly issued. Am I right in this ? If so, I am not justified in the latter case as it appears to me, in repaying any such cheques, until the vouchers have been examined in this office, and therefore must treat the credit itself as nugatory. Properly I ought to notify the bank when the notification is being forwarded to it by the Deputy Minister of Finance, that I cannot recognize the notice as justifying the new persons nominally authorized as having the power to pledge the government money for the purpose.

Let me try to make clear what seems to be involved in the words on the application of the Auditor both by the Act itself and what the Auditor General alone does under the Act and alone can do.

What are the objects in connection with government payments ? 1st. Not to pay anything but amounts due ; 2nd, to pay amounts due quickly.

It is not supposed that the audit office is the only office where care is taken to prevent irregular payments. See section 42: 'The deputy heads of the several departments or the officers, clerks or other persons charged with the expenditure of public moneys, shall respectively audit the details of the accounts of the several services in the first instance, and be responsible for the correctness of such audit.'

What is a special duty on the audit office and on the part of the Auditor General, is a duty on every other government official as far as he can reasonably be expected to do it. Unless the contrary were stated in section 30 or some other place where credits are spoken of, seeing that his assent is required, he would be supposed to exercise his full power to do, with reference to this mode of expending public moneys, what he is required to do when direct payments are made of this same public money.

At section 31. By this section the Auditor General shall see that no money is spent except when there is direct parliamentary appropriation, and only after the Governor in Council has decided to make use of the parliamentary direction to spend which has been entrusted to him.

I inclose several papers which will show you our process.

Although this letter is written with reference to a difficulty which exists in this office now, I should be glad to spend a day in Toronto at some early time to make the working of the section as clear as possible to you. It might have the additional advantage of throwing some light on the Martineau case.

I am, sir, your obedient servant,

J. L. McDOUGALL, *A.G.*

TORONTO, December 7, 1904.

DEAR SIR,—I have given the best consideration I can to your letter of November 29.

The subject you ask my views about seems rather a matter of the internal economy of the different departments or offices in the civil service than any question of law. In expressing my views about it I feel that I am scarcely giving what can be called a legal opinion, but more properly speaking, simply the considerations which on examining the Audit Act occur to me as illustrating the way in which it should be worked out.

Under section 30 it would seem to me that it is only the Minister who can cause credits to be issued. The Minister is to act upon application of the Auditor General, but I do not see that the Auditor has any part whatever in causing the credits to be issued, except that he from time to time applies to the Minister to do so.

Possibly this is a matter of form rather than of substance, because under the statute the initiative seems to rest entirely with the Auditor, and apparently no power is conferred upon the Minister to cause credits to be issued, except when the Auditor applies therefor, and I would think only in favour of such officials as the Auditor may name in his applications.

I would think, therefore, that there was no propriety in the letter of credit being signed by the Auditor General, except that it is a convenient means whereby to indicate to the bank that the particular credit is one which has the Auditor's approval, and for which he has applied.

But while the statute does not seem to contemplate the Auditor having any part in the actual issuing of the credit, the result seems practically the same, inasmuch as if credits are to be issued only on the application of the Auditor there can be no credit issued unless it has first had the Auditor's approval.

The bankers of the government are of course supposed to be acquainted with the provisions of the Audit Act, and if I am right in the view I am expressing that the Minister is empowered to issue credits only when and as the Auditor applies for them, the bank ought not to honour any letter of credit which the Auditor has not asked for, and I presume that if any credit was issued otherwise than on the application of the Auditor, when the monthly statement of moneys drawn under credits came to him he would not pass the statement as correct in so far as it included cheques signed by any other persons than such officers as he had asked credits for.

In this way of working out the statute I should think there would not be any practical difficulty. If any person was named, by Order in Council or otherwise, as what is termed a 'substitute signature', and if such person was an official in whom the Auditor had not confidence, he could decline to make application to the Minister for the issue of a credit to such person, and if the attention of the government bankers was called to the provisions of section 30, and the apparent precedent necessity for this application of the Auditor to the Minister, I should not suppose any letter of credit issued without the Auditor's previous application would be acted upon at the banks, or the cheques of any person honoured unless the Auditor had first asked that a credit issue in favour of such person.

The letters of credit, as I understand the practice, are in each instance issued in favour of some named official or officials. I assume that they are not issued simply in favour of a department without naming the person connected with such department whose signatures to cheques under the credit is necessary ; and if I am right in this assumption, the question of what officials are to be named as those in whose favour credits may issue seems to be altogether under the control of the Auditor.

I inclose herewith the forms of papers which you sent me to show the method of procedure in the department.

Yours truly,

A. B. AYLESWORTH.

AUDIT OFFICE, OTTAWA, December 12, 1904.

SIR,—With reference to the letter of Mr. A. B. Aylesworth, K.C., regarding the issuing of letter of credits under section 30 of the Audit Act, which letter I forwarded to you, I have much anxiety on one point with which it deals.

Cheques have been signed by certain persons with reference to whom I took no action, I not having been asked to do so. If I understand Mr. Aylesworth's view correctly I am not justified in passing the cheques for the repayment of the bank in such a case, even if I should have been justified in passing the application for a credit, if I had been asked. This is a very unpleasant position.

Then am I, or am I not bound to notify the banks of this difficulty so that they may not cash these cheques, or should I warn them that I shall not pass the cheques until I know more about the case? I write to you so that you may understand my difficulty and make such suggestions as occur to you for removing the difficulty. Every day will, so far as I can see, add to the difficulties until the cause is removed.

I am, sir, your obedient servant,

The Deputy Minister, Finance Department. J. L. McDOUGALL, *A.G.*

AUDIT OFFICE, OTTAWA, December 15, 1904.

SIR,—I inclose herewith a copy of a letter of my own to Mr. Aylesworth, and of his reply to me regarding credits issued under section 30 of the Audit Act. The reason I send this opinion to you is that I have not authorized the signatures of the substitutes at Moncton, not having been asked to do so ; and therefore, as indicated by Mr. Aylesworth in his opinion, I have no right to repay the bank on the cheques alone. I should be glad to take counsel with you as to the method in which the difficulty can be speedily remedied, so far as the future is concerned, at any rate.

I am, sir, your obedient servant,

The Deputy Minister, Railways and Canals. J. L. McDOUGALL, *A.G.*

Cornwall Canal: Electrical Horse-power raised from 125 to 180.

(*Discussion continued from page W—322.*)

AUDIT OFFICE, OTTAWA, January 6, 1904.

SIR,—The press of work incident to preparing our Annual Report for Parliament at an earlier date than usual, has delayed the taking up of your application for $2,981.74 in favour of the St. Lawrence Power Company, to pay them for 180 h.p. of electric energy instead of 125 h.p. between October 23, 1903 and September 1, 1904, at $63 per h.p. per year.

Whatever payment is ultimately made for the period between October 23, 1903, and April 30, 1904, can of course be paid only to Mr. M. P. Davis, in whose name the original accounts for 125 h.p. were rendered.

The 180 h.p. is the 4th term in the proportion—

165 : 238 :: 125 : 180 :

165 being the h.p. in motors up to July 1, 1903; 238 h.p. in motors up to September 1, 1904, as given by yourself in a list dated September 26, 1904; 125 the line-load on July 1, 1903; and 180 the line-load as calculated for September 1, 1904.

The figure of 238 h.p. in motors includes 176 h.p. for 11 lift-locks, being 4 h.p. for each gate.

By the attached report from Mr. Hayter of this office, who visited the canal on June 22, 1904, you will see that the 4 motors on Old Lock 15 had been taken off in the fall of 1903, and were still stored in sheds at the time of his visit.

Also, on account of the unwatering of the Basin between Old Locks 16 and 17, no navigation was possible through Old Locks 15, 16 and 17.

Moreover, one of the motors of Old Lock 19 had been detached, and placed on new Lock 19, in substitution for a disabled motor.

No information is on record in this office, as to the dates when the continuity of the electrical mechanism (and therefore the possibility of electrical operation) was suspended or restored in any of these cases. Please have these dates ascertained.

Mr. Stewart's certificates should have said that these motors were disconnected, and that consequently no electric current could pass through them.

Your application for $2,981.74 is returned herewith, for whatever alteration you may think necessary, in view of the information now given.

I would like to be supplied with summaries of whatever statistics are on record in your department, showing the actual number of lockages through Old Locks 15, 16, 17, 18, 19 and 20 during the navigation season of 1904.

I have the honour to be, sir, your obedient servant,

J. L. McDOUGALL, *A.G.*

The Deputy Minister Railways and Canals.

Re **Amherst Ticket Office.**

AUDIT OFFICE, OTTAWA, July 12, 1904.

SIR,—The return of Travelling Auditor Burns indicates that he did not find things satisfactory at the Amherst ticket office when he audited it on May 9, and that on May 23 he transferred the office to another agent.

A memo. in Mr. Williams' writing at the foot of the return states that the agent was suspended for short account, that the amount was made good by him and that he was reinstated by order of Honourable Minister.

The return of May 20, signed by the agent subsequently suspended, showed a balance on hand of $42.48. The return of May 31, signed by the new agent, commences with a balance on hand of $314.64, afterwards raised to $340.61.

I have to ask for a copy of the travelling auditor's report; and I should like to know what explanations the agent made as to the shortages and the unsatisfactory condition of his accounts.

Is it the rule that the restoration to office of an official suspended is made by the order of the minister as a matter of grace, or is the name of the minister employed to indicate only that the person is restored to office on the working out of general rules which apply to all, or is the explanation something else which has not occurred to me?

I am, sir, your obedient servant,

The Gen. Mgr., Govt. Rys. J. L. McDOUGALL, *A.G.*

INTERCOLONIAL RAILWAY, MONCTON, N.B., July 21, 1904.

DEAR SIR,—In answer to your letter of July 12, with reference to the shortage in the accounts of the Amherst ticket agent, and his suspension and reinstatement in the service, I send you herewith all the papers that I have in regard to this. As you will see by the correspondence the original papers were sent to the minister at his request on June 7. There is a telegram among the papers, dated June 10, from the minister, stating that Berry was to be reinstated, if the Guarantee Company were satisfied. There is a letter from Mr. Price, dated June 14, stating that Mr. Williams, the treasurer, had received the necessary documents from the Guarantee Company, and that Berry had been reinstated. The papers have not yet been returned by the minister.

I am, sir, your obedient servant,

The Auditor General. D. POTTINGER, *Gen. Mgr.*

AUDIT OFFICE, OTTAWA, July 28, 1904.

SIR,—I have received your letter of the 21st inst., in reply to mine of the 12th, in reference to the shortage of the ticket agent at Amherst and his reinstatement, the shortage having been made good. You state that the minister made the reinstatement of the agent conditional on the Guarantee Company being satisfied, and that your treasurer had received the necessary documents from the Guarantee Company. I would like to have a copy of these documents.

You have not answered the last paragraph of my letter inquiring if the action of the minister in this case was a matter of grace, or was it the working out of general rules applicable to all?

The report of the travelling auditor reflects very strongly on the conduct of the agent, and there is nothing in the correspondence you have sent me, from him, to explain or excuse his actions. Under the circumstances, so far presented to me, there does not seem to be any reasons to indicate to other employees engaged in the receipt of money that this employee before having been reinstated had proved to the Intercolonial management that the circumstances which appeared against him were in reality not so.

I am, sir, your obedient servant,

The Gen. Mgr., Govt. Rys. J. L. McDOUGALL, *A. G.*

INTERCOLONIAL RAILWAY, MONCTON, N.B., August 24, 1904.

DEAR SIR,—In answer to your letter of July 28, with reference to the Amherst ticket agent, I send you the following additional papers asked for. There is a letter from Mr. Williams, treasurer, dated August 6, inclosing the papers that he enumerates.

In regard to your question whether the action of the minister was a matter of grace or whether it was the working out of general rules that apply to all, I can only say that I sent you a copy of the minister's telegram of June 10, and I do not know further than that what the minister's views were in regard to it.

I am, sir, your obedient servant,

The Auditor General. D. POTTINGER, *Gen. Mgr.*

Re **Audit of Stations.**

INTERCOLONIAL RAILWAY, MONCTON, N.B., February 8, 1904.

SIR,—In answer to your letter dated January 22, with reference to the audit of stations, I send you herewith a letter from Mr. Williams, treasurer, which deals pretty fully with this question.

I think it would be desirable to have the stations audited twice a year. Probably we could accomplish this if we were able to keep the travelling auditors at that work entirely, but as the travelling auditors are the only men on the general office staff, excepting the treasurer, the paymaster and the cashier, who are guaranteed for a pretty large sum of money, they are the only men who are available to relieve the paymaster or the cashier in case of their absence or illness, and during the past year this has taken up a good deal of the time of the travelling auditors.

I think we will have to take into consideration the question of appointing another travelling auditor, and will have a talk to Mr. Williams about this without delay.

I am, sir, your obedient servant,

The Auditor General. D. POTTINGER, *Gen. Mgr.*

INTERCOLONIAL RAILWAY, MONCTON, N.B., February 5, 1904.

DEAR SIR,—Replying to your favour of the 25th ult., covering the Auditor General's letter of January 22, *re* audit of stations.

It is very desirable that the whole of the stations and ticket offices should be audited at least twice in each year, but on account of the great amount of the travelling auditors' time that has had to be given to the larger stations during the past year, it has been impossible to make a personal inspection and audit of the smaller ticket stations along the line of railway, and the outside ticket agencies. From a financial standpoint there is little risk of loss at these points, since the traffic auditor is advised of all tickets furnished these places, and the collection of tickets made by the conductors, and assorted in the audit office, furnishes a complete check upon the ticket reports, so that any ticket sold out of order, or of a higher number than accounted for on the agent's report, would quickly be discovered.

As the work at the larger stations—St. John, Halifax, Sydney, &c.—is now in good shape we hope to take up the auditing of the smaller stations, the outside ticket agencies, express company, and dining car service, and clear up the arrears shortly.

It must be borne in mind that though we have three travelling auditors, half the time of one of them is given to the checking of the Grand Trunk Railway accounts for joint section expenses, &c.; and also that one was off for several months relieving the late cashier (Mr. Thomson) during his fatal illness; and subsequently the paymaster during his leave of absence, and since his death, pending the appointment of

a successor; so that practically only two travelling auditors have been available the whole of the year.

In view of the great increase in the revenue of the railway it would, I think, be advisable to appoint an additional travelling auditor.

I am, sir, your obedient servant,

The Gen. Mgr., Govt. Rys. T. WILLIAMS, *Chief Acct. and Treasurer.*

Re Station Agents' Returns.

AUDIT OFFICE, OTTAWA, March 24, 1904.

SIR,—The following is a list of station agents who are not sending their returns regularly, and I have to ask you to have the missing returns enumerated thereon furnished to this office:—

Amherst ticket, February 10-20.
Aulac, January 10-20, February 10-20.
Baddeck (monthly), none for February.
Brookfield, January 31, February 29.
Bloomfield, January 20.
Campbellton ticket, January 31.
Causapscal, February 28.
Cedar Hall, January 20, February 10.
Hampton, January 31, February 20.
Kent Junction, February 10.

I am, sir, your obedient servant,

The Gen. Mgr., Govt. Rys. J. L. McDOUGALL, *A.G.*

INTERCOLONIAL RAILWAY, MONCTON, N.B., April 2, 1904.

DEAR SIR,—I have your letter dated March 23, with reference to the agents' returns, giving a list of the agents who have ceased to send returns, and I will have this looked up.

I am, sir, your obedient servant,

The Auditor General. D. POTTINGER, *Gen. Mgr.*

Re **Agents' Returns.**

AUDIT OFFICE, OTTAWA, March 23, 1904.

SIR,—The following is a list of station agents who have ceased sending returns to this office:—

Acadiaville, none since December 31.
Boundary Creek, none since September.
DeBert, none since December 31.
Mitchell, none since November 10.
Montreal (Windsor Hotel), none since July 10.
Nicolet, none since January 20.
Newcastle, none since December 10.
Pomquet, none since December 20.
Passekeag, none since May, 1903.
Petit Roche, none since August 10.
Petitcodiac, none since August 20.
Quebec, Chateau Frontenac, none since December 31.
Plumweseep, none since June, 1903.
Scotch Hill, none since February, 1903.
Sydney freight, none since June 30, 1903.
Shediac, none since January 10, 1904.
Sydney Mines, none since September 30.
St. Bruin, none since May 31.
St. Denis wharf, none since August 10.
St. Hyacinthe, none since July 20.
St. Henri de Montreal, none since December 20.
St. Hilaire, none since October 10.
St. Hubert, none since December 10.
St. Rosalie, none since October 10.
Trois Pistoles, press copy, none since January 10, 1904.
St. John station ticket, none since July 7, 1903.
Montreal, passenger, none since August 16, 1903.
Montreal, freight, none since June, 1903.

I am, sir, your obedient servant,

The Gen. Mgr., Govt. Rys. J. L McDOUGALL, *A.G.*

AUDIT OFFICE, OTTAWA, March 28, 1904.

SIR,—The St. John freight agent sends in Form No. 43 on the 15th and last days of the month, instead of every ten days.

The Rivière du Loup ticket agent sends in Form No. 163 daily and No. 43 at the end of the month for the last ten days. The former return should be discontinued and the latter sent regularly on the 10th, 20th and last days of the month.

I am, sir, your obedient servant,

The Gen. Mgr., Govt. Rys. J. L. McDOUGALL, *A.G.*

INTERCOLONIAL RAILWAY, MONCTON, N.B., March 31, 1904.

DEAR SIR,—I have your letter dated March 28, about agents' returns; the St. John freight agent in regard to Form No. 43, and the Rivière du Loup agent in regard to Form No. 163 and No. 43, and it will be arranged.

I am, sir, your obedient servant,

The Auditor General. D. POTTINGER, *Gen. Mgr.*

Re **Deposits and Remittances.**

AUDIT OFFICE, OTTAWA, March 28, 1904.

SIR,—The following agents might be called upon to make deposits or remittances somewhat more frequently, viz.:—

Chatham, Montreal (Windsor Hotel).
St. Hyacinthe town, Quebec (Chateau Frontenac).
Trenton, Rivière du Loup freight.
Pugwash, Point Tupper.
Point du Chene, Ste. Flavie.
Trois Pistoles and Chaudière Junction.

I am, sir, your obedient servant,

The Gen. Mgr., Govt. Rys. J. L. McDOUGALL, *A.G.*

INTERCOLONIAL RAILWAY, MONCTON, N.B., March 31, 1904.

DEAR SIR,—I have your letter dated March 28, with reference to deposits and remittances of the agents at Chatham, Windsor Hotel, Montreal, &c., and they will receive instructions to deposit more frequently.

I am, sir, your obedient servant,

The Auditor General. D. POTTINGER, *Gen. Mgr.*

Re **Cashier's Monthly Summaries of Cash.**

AUDIT OFFICE, OTTAWA, March 30, 1904.

SIR,—I beg to call your attention to the manner in which the cashier's monthly summaries of cash are prepared.

Seeemingly, the figures are copied from his cash book, also the additions, as they are not tested, for instance:

In July, Sydney freight is entered as $25,742.12, instead of..	$ 25,740 12
In November, Elmsdale, $299.83, instead of.....	699 83
In November, Penobsquis, $509, instead of.....	590 00
In December, Temiscouata Railway, $1,353, instead of.....	1,353 39

I have to ask that in future these statements be verified before coming here.

In August last St. Denis wharf is credited with $288, and St. Denis with $25. The agent at St. Denis wharf claims to have remitted the amount credited to both, viz.: $313.

In October, Halifax freight is credited with $47,382.02, and Halifax D.W.T. with $2,472.01, instead of Halifax freight $49,642.02, and Halifax D.W.T. with $212.01.

As the figures in this statement are the figures upon which the cash collections by agents and head office are based for the purposes of my report, it is essential that they should be correct.

I am, sir, your obedient servant,

The Gen. Mgr., Govt. Rys. J. L. McDOUGALL, *A.G.*

Re Halifax Freight.

AUDIT OFFICE, OTTAWA, March 30, 1904.

SIR,—In the return for February, 1903, credit is taken for $60.25, being freight on goods delivered without collection of charges. In the return for December, 1903, credit is taken for $263.06 for a like reason, and $84.21 of this amount is entered as 'cannot be collected.'

What are the regulations in reference to the delivery of goods without the charges being paid?

The tissue copies of freight in store from this agent are not very legible. It would be preferable to get these details less frequently if necessary, but then to have a written copy.

I am, sir, your obedient servant,

The Gen. Mgr., Govt. Rys. J. L. McDOUGALL, *A. G.*

Re St. Hyacinth Freight.

AUDIT OFFICE, OTTAWA, March 25, 1904.

SIR,—The return of the freight agent at St. Hyacinthe for December takes credit for $8,876.05, Nicolet deficit; to be adjusted by audit office.

I have to ask for an explanation of this item.

I am, sir, your obedient servant,

The Gen. Mgr., Govt. Rys. J. L. McDOUGALL, *A.G.*

Re Dartmouth Defalcation.

INTERCOLONIAL RAILWAY, MONCTON, N.B., April 4, 1904.

DEAR SIR,—For your information I send you herewith copies of letters from Mr. Williams, Mr. Bruce and Mr. J. W. Wallace, in regard to the Stevens case.

I am, sir, your obedient servant,

The Auditor General. D. POTTINGER, *Gen. Mgr.*

INTERCOLONIAL RAILWAY, MONCTON, N.B., March 31, 1904.

DEAR SIR,—Please find inclosed a report from Mr. Bruce, traffic auditor; and also from J. W. Wallace, travelling auditor, with respect to the trial of Mr. Stevens, late agent at Dartmouth.

I am, sir, your obedient servant,

The Gen. Mgr., Govt. Rys. T. WILLIAMS, *Chief Acct. and Treasurer.*

INTERCOLONIAL RAILWAY, MONCTON, N.B., March 30, 1904.

DEAR SIR,—Herewith please find Mr. Wallace's report of the Stevens' matter. I have nothing to add to it. I was with Mr. Mellish from Friday morning up to the rendering of the verdict Saturday night. The judge's charge was strong against the defendant, but notwithstanding this the jury disagreed. I understand the case is to be re-tried next October term. While not altogether expecting a disagreement, Mr. Mellish thought well to reserve certain evidence which he could use in case of a new trial. There was quite enough evidence already before the jury to convict, and we thought it better to withhold this.

I am, sir, your obedient servant,

The Auditor General. J. R. BRUCE, *Traffic Auditor.*

AUDIT OFFICE, MONCTON, N.B., March 28, 1904.

DEAR SIR,—Reporting on the trial of William Stevens, late station master at Dartmouth, for the theft of $9,115.18, which began at Halifax on March 15.

I might say that as far as possible I got together all the data bearing on the case that appeared to be necessary, which I laid before the attorney for the railway, Mr. Mellish, so that he could become conversant with all its details together with the methods of railway accounting, &c. I am free to say that the arguments made in court by Mr. Mellish and his handling of the case ought to have convinced any intelligent man of the guilt of defendant Stevens. He (Stevens) acknowledging that he had been falsifying his accounts for some time previous in order to cover up his shortage, also the judge's charge to the jury was very strong against Mr. Stevens, so much so that I felt sure they must bring in a verdict against the defendant Stevens. However, after being out for several hours the jury failed to agree and so reported. I understand they stood 10 to 2.

I presume this disagreement will no doubt necessitate another trial at the next session of the Supreme Court.

I am, sir, your obedient servant,

J. R. BRUCE, Traffic Auditor. J. W. WALLACE, *Travelling Auditor.*

AUDIT OFFICE, OTTAWA, April 8, 1904.

SIR,—I have received your letter of the 4th inst., inclosing copies of letters from Mr. Bruce and Mr. Wallace in reference to the trial of William Stevens, the station master at Dartmouth, who misappropriated $9,115.18 of the railway funds.

It is regrettable that the jury failed to convict. The rigid punishment of defaulters would have a beneficial effect on all in charge of government funds.

I wish to point out that you have given me no particulars or explanations as to how this agent could get so much in arrears without detection. Mr. Wallace states that Stevens acknowledged that he had been falsifying his accounts for some time previous, to cover up his shortage. What was the nature of these falsifications? Was there no means of detecting them? When was the station audited previous to the discovery of the defalcation?

I am, sir, your obedient servant,

The Gen. Mgr., Govt. Rys. J. L. McDOUGALL, *A.G.*

INTERCOLONIAL RAILWAY, MONCTON, N.B., June 9, 1904.

DEAR SIR,—I duly received your letter dated April 8, requesting some further information in regard to the defalcation of William Stevens, the station master at Dartmouth, and I have asked the treasurer, Mr. Williams, to give me the information to enable me to answer your letter.

I am, sir, your obedient servant,

The Auditor General. D. POTTINGER, *Gen. Mgr.*

Re **Intercolonial Railway Stores.**

AUDIT OFFICE, OTTAWA, November 8, 1904.

SIR,—I have to ask for a copy of the inventory made as on June 30 last, of Intercolonial and Prince Edward Island Railways, stores on hand, made up to show the quantities called for by the check ledger, and the quantities actually on hand.

As soon as it is completed I would also like to have a copy of inventory of track, stores and rails taken as on October 31.

I am, sir, your obedient servant,

The Gen. Mgr., Govt. Rys. J. L. McDOUGALL, *A.G.*

Re Fees for Passports.

AUDIT OFFICE, OTTAWA, August 13, 1904.

SIR,—I have to ask for a copy of the regulations governing the issue of passports.

In the accounts of 1903-4, several instances occur of a passport covering two persons having been issued and only $4 accounted for. In several other instances $8 was charged when the passport covered two persons, and in one case where three persons are covered, $12 has been charged.

I am, sir, your obedient servant,

The Under Secretary of State. J. L. McDOUGALL, *A.G.*

SECRETARY OF STATE DEPT., OTTAWA, August 16, 1904.

SIR,—Replying to your letter of the 13th instant, respecting fees upon passports, I beg to enclose, as therein requested, a copy of the regulations governing the issue of the same.

With regard to your observations concerning the fees upon these documents shown in the accounts 1903-4, I may say that in every instance the charge has been at the rate of four dollars for a passport whether in favour of one or more persons. Wherever eight dollars have been charged there have been two passports issued, and wherever twelve dollars have been charged there have been three passports issued.

I am, sir, your obedient servant,

The Auditor General. P. PELLETIER, *Actg. Under Sec. of State.*

Re Fees and Commissions.

AUDIT OFFICE, OTTAWA, March 15, 1904.

SIR,—In September and October, 1902, I had a correspondence with you in reference to the fees on the commissions issued to the Lieut.-Governor of New Brunswick and the Solicitor General, which you claimed were exempt by Order in Council.

The result of the correspondence was that the fees in question were paid, and I was under the impression that the question was settled.

In the return from your department for July last the commission issued to the Lieut.-Governor of Quebec on February 1, 1903, is entered as exempt from fee; and in the return for February just to hand the commission issued to Solicitor General Lemieux is also entered as exempt.

According to the tariff established by Order in Council in accordance with the Act, a fee of $20 is payable on all commissions issued to lieut.-governors, ministers of the Crown, judges of all courts, junior judges, deputy ministers and King's counsels.

In view of this regulation it seems to call for some explanation why special exemptions are made.

I am, sir, your obedient servant,

The Under Secretary of State. J. L. McDOUGALL, *A.G.*

SECRETARY OF STATE DEPT., OTTAWA, March 16, 1904.

SIR,—I have to acknowledge the receipt of your letter of the 15th instant, with reference to the non-payment of fees on commissions issued to Lieut.-Governor Jetté and the Solicitor General. It is true, as you observe, that a general Order in Council prescribes that a fee of twenty dollars be charged on commissions issued to lieutenant-governors and ministers of the Crown. In the cases under consideration, however, the appointing minutes of Council expressly declare that no fee shall be levied on the commissions to be issued to Sir Louis Jetté and to Mr. Lemieux. The reason, therefore, why I did not charge these gentlemen a fee is that I had no authority to do so, the regulations authorizing this charge having been set aside, *quoad* both of them, by the Governor General in Council.

I am, sir, your obedient servant,

The Auditor General. JOSEPH POPE, *Under Sec. of State.*

AUDIT OFFICE, OTTAWA, April 15, 1904.

SIR,—In my letter of March 15 last I asked for an explanation why the commissions issued to the Lieut.-Governor of Quebec and to Solicitor General Lemieux should be exempt from paying the fee established by Order in Council under authority of the Act.

I should have referred in that letter to the commission issued to the Lieut.-Governor of Ontario which was also exempted from the fee.

As this revenue comes under the control of your department, I have to inquire if you purpose having the General Order in Council regulating the fees to be charged, amended; or if it is the intention to except certain commissions without assigning any reason therefor.

I recognize the full force of what you say in your letter of the 16th ulto, which is practically that your duty is to recognize an Order in Council on the subject; but the practice generally is to consult the administering department before making a recommendation to Council. Council does not usually, I think, disregard in such matters the recommendation. The Secretary of State would, I should suppose, see a rather serious danger of reflection on the government by the continuance of a system of exempting members of the government from fees on their commissions, while I dare say the subject has not attracted the attention of either the government as a body, or of the individual members.

I am, sir, your obedient servant,

The Under Secretary of State. J. L. McDOUGALL, *A.G.*

AUDIT OFFICE, OTTAWA, April 15, 1904.

SIR,—I have to inquire why no fees were collected on the following commissions:—

Holmes Newcombe, fishery officer, June 9, 1903.
Hon. Chas. Moss, administrator of the province of Ontario, July 2, 1903.
Albert Peter Low, fishery officer, August 13, 1903.
John Douglas Moodie, commissioner of police, August 13, 1903.

I am, sir, your obedient servant,

The Under Secretary of State. J. L. McDOUGALL, *A.G.*

SECRETARY OF STATE DEPT., OTTAWA, April 18, 1904.

SIR,—Replying to the inquiry contained in your letter of the 15th instant, I have the honour to state that in the case of the Hon. Chas. Moss, administrator of the government of the province of Ontario, no fee was collected upon his commission because the Order in Council appointing him declared that none should be exacted. As regards Messrs. Holmes, Newcombe and Albert Peter Low, no fees were asked because in each case the commission issued was merely to give the officer in question the powers of a justice of the peace, and in the case of John Douglas Moodie the authority of a commissioner of police, in connection with special service in which they were engaged and solely for the convenience of the government.

I am, sir, your obedient servant,

The Auditor General. JOSEPH POPE, *Under Sec. of State.*

AUDIT OFFICE, OTTAWA, August 13, 1904.

SIR,—According to the tariff of fees upon commissions established by Order in Council in accordance with the Act, a copy of which is published in your annual report, there is a fee of $20 upon commissions issued to lieutenant-governors.

The Orders in Council appointing lieutenant-governors in recent years, exempt the payment of the fee in each case, the latest instance being the appointment of Lieut.-Governor Forget, March 30 last.

If it is the policy of the government that all commissions to lieutenant-governors, shall be exempt from payment of fee, would it not be desirable to so amend the General Order in Council.

I am, sir, your obedient servant,

The Under Secretary of State. J. L. McDOUGALL, *A.G.*

SECRETARY OF STATE DEPT., OTTAWA, September 13, 1904.

SIR,—Absence from town prevented my acknowledging earlier the receipt of your letter of the 13th ultimo, on the subject of fees on commissions. In reply thereto I can only say that I do not know the reasons which move the government, from time to time, to exempt certain officials from the payment of fees on commissions. A minute of Council comes to me with this exemption in it, and as it is my duty, I observe its directions. In the case of Lieut.-Governor Forget I presume the reason for the exemption is to be found in the fact that it is a re-appointment, he having, I fancy, paid the fee in the first instance.

I am, sir, your obedient servant,

The Auditor General. JOSEPH POPE, *Under Sec. of State.*

AUDIT OFFICE, OTTAWA, April 27, 1904.

SIR,—I have to inquire if the fees on the following commissions have been paid, and if so, when :—

Hon. A. G. Blair, as Chief Commissioner, Railway Commission, issued February 1, 1904.

James Mills, as member of Railway Commission, issued February 1, 1904.

I am, sir, your obedient servant,

The Under Secretary of State. J. L. McDOUGALL, *A.G.*

SECRETARY OF STATE DEPT., OTTAWA, April 28, 1904.

SIR,—Replying to your letter of the 27th instant, I have to state that the fees upon the several commissions to which you refer have not yet been received.

I am, sir, your obedient servant,

The Auditor General. JOSEPH POPE, *Under Sec. of State.*

AUDIT OFFICE, OTTAWA, November 28, 1904.

SIR,—You stated in your letter of April 28, that the fees on the following commissions had not been paid :—

Hon. A. G. Blair, chief commissioner, Railway Commission.

James Mills, member, Railway Commission.

I have to inquire if these fees have since been paid, and if not what steps you have taken in reference thereto.

I am, sir, your obedient servant,

The Under Secretary of State. J. L. McDOUGALL, *A.G.*

SECRETARY OF STATE DEPT., OTTAWA, November 30, 1904.

SIR,—Replying to the inquiry contained in your letter of the 28th instant, I beg to say that the fees upon commissions issued to the Hon. A. G. Blair, the Chairman, and Mr. James Mills, of the Board of the Railway Commission have not yet been paid. I am again calling the attention of these gentlemen to the omission on their part.

I am, sir, your obedient servant,

The Auditor General. JOSEPH POPE, *Under Sec. of State.*

Pictou, Murray Harbour and Montague Bridge: The Three Rivers Steamship Co., contractor; semi-weekly service from July 1 to Dec. 17, 1903, and from April 21 to June 30, 1904	1,200 00
Port Mulgrave, Arichat and Canso: Hugh Cann & Son, contractor: daily service from Mulgrave to Arichat and Canso; four times a week from Mulgrave to Guysboro' during summer, and three times during winter; weekly service to Cheticamp during navigation.	7,849 10
Port Mulgrave and St. Peters: The Richmond Steamship Co., contractor; daily service to St. Peters, two trips each week, extended to Irish Cove and Marble Mountain, from April 25 to Dec. 31, 1903	5,000 00
Prince Edward Island and Mainland: Charlottetown Steam Navigation Co., Ltd., contractor; daily service from Chorlottetown to Pictou from March 31, and from Summerside to Point du Chene to Dec. 18, 1903	12,500 00
Quebec and Gaspé Basin: Bouchard Bros., contractors; semi-monthly service, July 1 to Nov. 15, 1903	5,000 00
Quebec, Natashquan and Blanc Sablon: Holliday Bros., contractors; fortnightly service from April 6 to Nov. 24, 1903	8,000 00
St. Catherines Bay and Tadousac: Price Bros. & Co., contractors; semi-daily service, Nov. 15, 1903, to May 15, 1904	2,000 00
St. John and Digby: The Dominion Atlantic Ry. Co., contractor: daily service during July, August, Sept. and June, four times a week during Oct., Nov., Dec., March, April and May. three times a week during Jan. and Feb., 12 m. to June 30, 1904	12,500 00
St. John and Halifax via Yarmouth: Wm. Thomson & Co., contractors: service weekly from Jan. 14 to June 27, 1904, $4,367.96; less paid in 1904-5, $521.80	3,846 16
St. John and Minas Basin: Wm. R. Potter, contractor; weekly service to ports on Minas Basin from Mar. 16 to Dec. 14, 1903; fortnightly service to Maitland and Bass River during same period	3,000 00
St. Stephen, St. Croix River points, &c.: The Deer Island and Campobello Steamboat Co.; semi-weekly service during winter and tri-weekly during summer, 12 m. to Dec. 31, 1903.	3,000 00
Sydney and Bay of St. Lawrence: Bras d'Or Steamship Co., Ltd., contractors; weekly service between Sydney, St. Ann's Bay and Bay of St. Lawrence, from April 21 to June 15, and from Oct. 15 to Dec. 31, 1903; semi-weekly service between Sydney, St. Ann's Bay and Neil's Harbour from June 15 to Oct. 15, 1903	1,500 00
Sydney and Whycocomagh: Bras d'Or Steamship Co., Ltd., contractors: service semi-weekly from April 22 to June 15 and from Oct. 15 to Dec. 21, three times each week from June 15 to Oct. 14, 1903	1,000 00
Victoria, Vancouver and Skagway: The Canadian Pacific Navigation Co., Ltd., contractors; route A, Victoria, Vancouver and Skagway, four times a month from June to Oct., twice a month, Nov. to Feb., three times a month, March to May; route B, Victoria, Vancouver, Naas Harbour, semi-monthly	12,500 00
Victoria and west coast of Vancouver Island: The Canadian Pacific Navigation Co., Ltd., contractor; route C, Victoria and Ahousset, Quatsino, Cape Scott, three times or four times each month	2,430 55
Wrecking steamer at Quebec: George T. Davie & Sons, contractors; services of str. *Lord Strathcona*, held in readiness at Quebec for wrecking purposes, 12 m. to June 30, 1904	10,000 00
Foreign Services ($777,464.29).	
Canada and Australia: Canadian-Australian Royal Mail SS. Line, contractors; 12 round trips (arrival of *Aorangi* at Vancouver) to July 7, 1904, $137,832.19, less paid in 1904-5, $21,032.19	116,800 00
Canada, China and Japan (63-64 Vict. Chap. 9) paid through H.M. Postmaster General, London, Eng	73,000 00
Carried forward	329,783 68

Mail Subsidies and Steamship Subventions—*Continued.*	$ cts.
Brought forward	329,783 68
Foreign Service—Concluded.	
Canada and South Africa: monthly service from Montreal or St. John to Capetown and two additional ports, July 7, 1903 to June 19, 1904, Elder-Dempster Shipping Co., Ltd., and Furness, Withy & Co., Ltd., contractors	146,000 00
Canada and Great Britain: H. & A. Allan contractors; weekly service from Montreal or St. John to July 14, 1904, sailing from Montreal, 5 at £1,000, 8 at £750, 17 at £560; sailing from St. John or Halifax, 6 at £1,000, 17 at £750, $186,150; less charged to 1904-05, $11,150	175,000 00
Halifax and Liverpool via St. John's Nfld: Furness, Withy & Co., contractors; 21 sailings from Halifax from July 8, 1903, to June 9, 1904	20,000 00
Halifax and Jamaica: The Halifax and West India SS. Co., Ltd., contractors; monthly sailings from Halifax, June 17, 1903, to May 14, 1904	13,800 00
Halifax and Newfoundland via Cape Breton: Pickford & Black, contractors; 12 round trips from May 5 to Dec. 30, 1903	1,714 29
Montreal or St. John and Manchester: The Manchester Liners, Ltd., contractors; fortnightly sailings from Montreal in summer and from St. John in winter, July 3, 1903, to July 9, 1904	35,000 00
Prince Edward Island and Great Britain: The Manchester Liners, contractors; two sailing from Charlottetown, Oct. 18 and Nov. 25, 1903	2,500 00
Prince Edward Island, Cape Breton and Newfoundland: Hugh McMillan and Henry Aitken, contractors; 3 trips to June 30, 1904	1,500 00
St. John, Dublin and Belfast: The Ulster Steamship Co., Ltd., contractors; 3 round trips from Nov. 23, 1903, to April 17, 1904	2,250 00
St. John and Glasgow: Donaldson Bros., contractors; 20 round trips from Nov. 7, 1903, to April 24, 1904	15,000 00
St. John, Halifax and London: Furness, Withy & Co., contractors; sailings at intervals of not more than 15 days, from July 2, 1903, to June 11, 1904	25,000 00
St. John, Halifax, London and Antwerp: The CanadianPacific Ry. Co., contractors; 8 sailings from St. John, Jan. 3 to April 16, 1904	13,500 00
St. John, West Indies and South America: Pickford & Black, contractors; fortnightly sailings from St. John, July 20, 1903, to June 18, 1904, 12 m. at $10,950 per m	131,400 00
Victoria and San Francisco; The Pacific Coast Steamship Co., contractors; service every 5 days, 12 m. to June 30, 1904	5,000 00

Bounty on Articles Manufactured from Steel made in Canada.

AUDIT OFFICE, OTTAWA, Aug. 31, 1904.

SIR,—With reference to your application for bounty on 'rolled, round wire rods not over three-eighths of an inch in diameter,' I beg to call your attention to the certificates given by your agent at Sydney, Mr. Russell, and also your agent at Montreal, Mr. James G. Parmelee. Both certify 'that the quantity and number of articles manufactured from steel which conforms to the requirements of the Act, respecting Canadian steel subject to bounty, are as above stated.'

In the description referred to in this certificate, the rod iron sold is stated to be not over three-eighths of an inch in diameter. It seems to me that instead of certifying in the negative, your agent should certify in the affirmative and give the actual dimensions of the rod iron sold and upon which bounty is claimed.

I am holding your applications until I hear from you on this point. There cannot be any difficulties in the way of obtaining the certificate which I desire and which I think is necessary.

I am, sir, your obedient servant,

The Deputy Minister, Trade and Commerce, J. L. McDOUGALL, *A. G.*

TRADE AND COMMERCE DEPARTMENT, OTTAWA, September 19, 1904.

Sir,—Referring to yours of the 31st August in re the diameter of round wire rods covered by claim of the Dominion Iron and Steel Company:—

I hand you now a cetrificate from the controller of the company to the effect that the rods shipped during the months of June and July were what is known as No. 5 gauge, also a certificate from Mr. Russell to the same effect.

I would add, however, that No. 5 gauge where he states it to be equal to .220, he refers to the old Birmingham or Stubbs gauge which until recently was the legal gauge in Canada. It is equivalent to the present Imperial legal standard of .212. In either case you will note that the size is far below what is required under the terms of the Act

I am, sir, your obedient servant,

W. G. PARMELEE, *Deputy Minister.*

The Auditor General.

Use of Iron Ore in Furnace Charge in Manufacture of Steel.

AUDIT OFFICE, OTTAWA, April 26, 1904.

Sir,—Having referred the question, as to whether the iron ore used in the manufacture of steel is an 'ingredient' under the Bounties Act, to Mr. Aylesworth, K.C., I have now received his opinion, of which I inclose a copy.

Acting upon this opinion I consider myself justified in limiting the contested ingredient to the amount of iron in it.

I am, sir, your obedient servant,

J. L. McDOUGALL, *A. G.*

The Deputy Minister, Trade and Commerce.

TORONTO, April 21, 1904.

DEAR SIR,—I am sorry that I have not been able before this to give you my opinion in this matter, but I have been so crowded with work continuously that I have been unable till now to take the matter up for consideration.

The question is the interpretation to be put upon the Bounties Act of 1897, 60-61 Vic., chap. 6. Under this statute a bounty may be paid 'on steel ingots manufactured from ingredients of which not less than fifty per cent of the weight thereof consists of pig iron made in Canada.'

It seems that in the manufacture of steel from pig iron a quantity of iron ore is used, in addition to lime, and scrap steel or iron, with addition of a few other materials of trifling weight comparatively. The principal ingredient in the manufactured steel is of course the pig iron, but to convert this pig iron into steel, lime has to be used as a flux, and it is of practical advantage to use iron ore as a re-agent. The purpose of using the ore it is said is in order that the impurities contained in the pig iron, such as sulphur, carbon and silicon, may be as far as possible removed by their combining with the oxygen contained in the ore.

I am told, however, that in the process there is undoubtedly some of the iron contained in the iron ore converted into steel, so that in some instances the steel produced exceeds in weight the amount of pig iron and scrap iron with which the furnace has been charged. Ordinarily, however, the great bulk of the iron ore which has been used as a re-agent is thrown aside in slag, such slag containing a very considerable percentage of metallic iron.

The question is whether, in computing the percentage of pig iron used, the weight of the iron ore may be ignored or must be taken into consideration.

In my opinion it would not be proper to take into account the whole weight of the iron ore. Possibly it would be right to ignore the weight of it altogether, though some comparatively small portion of the iron in it is present in the manufactured steel.

But the iron ore as mined consists of only a percentage of pure iron. It consists to the extent of probably more than one half, of rock or other useless though heavy material, which, after passing through the steel furnace, becomes the slag or refuse which is thrown away. This rock could not, in my opinion, properly be considered one of the ingredients of the manufactured steel, and its weight certainly could not, I think, be properly taken into consideration at all as against the weight of pig iron the manufacturer has used.

The word 'ingredients' necessarily conveys the idea of something which constitutes a component part of the resulting steel. We speak of the ingredients of which a medicinal mixture is composed, and the word implies, in its etymology and ordinary significance, something which enters into the composition of a thing as a constitutent element.

In my opinion, therefore, it is only something which in some form or other is present in the manufactured steel which can properly be considered an ingredient thereof. The lime which is used, and necessarily used, in the process of manufacturing the steel, would not be an ingredient of the steel, any more than the fuel consumed in the process of manufacture, or the furnace in which the process is carried on, could be considered such an ingredient.

In the same way it seems to me the iron ore which is used cannot properly be considered an ingredient of the manufactured product, unless it may be to the extent of the iron in it.

It is to be noticed also that the statute speaks of the weight of the ingredients 'from' which the steel is manufactured. The use of this word 'from' seems to further the idea conveyed in the word 'ingredients.' The thing to be considered is the weight of the ingredients out of which the steel is made, not the weight of the things which are used in the process.

I have referred to the French version of the statute, and find that the preposition there used is 'avec.' I concede that the use of this word in the French version detracts from the argument which otherwise might be based on the use of the word 'from' in English. I understand the French word 'avec' in this connection signifies making use of, as one would say to bind with chains, or to strike with a hammer. If

this is the true meaning of the statute it would seem right to include the weight of everything in the way of material which it is necessary to use in the process, as something by the use of which the steel is made, but I base the opinion I have formed mainly on the use of the word 'ingredients.' The same word is used in the French version, and it seems to me impossible to say that either the lime, or the rock of the iron ore, is an ingredient of the manufactured steel.

For these reasons I am of opinion that in estimating the weight of the 'ingredients' no account ought to be taken of the weight of iron ore used, beyond, at most, the weight of such percentage of iron as the ore might contain.

I return herewith the memo. signed by Mr. Plummer, which you left with me when here.

I am, sir, your obedient servant,

The Auditor General. A. B. AYLESWORTH.

OTTAWA, February 23, 1904.

SIR,—Referring to your letter of the 4th January last in which you submit for my opinion the question whether your department is justified in refusing payment in part of the claim for bounty upon steel ingots made by the Dominion Iron and Steel Company of Sydney, C.B., under the circumstances set forth by you, I beg to state as follows :—

Under the Acts providing for such bounties, bounty is payable on 'steel ingots manufactured from ingredients of which not less than fifty per cent of the weight thereof consists of pig iron made in Canada.'

You state that in the past few months it has come to the knowledge of the department that iron ore was being used by the company in larger quantities than formerly in the process of manufacturing steel ingots. This, however, at first was not shown upon the claim sheets submitted to the department. The company was requested to show the quantities used, which it did, under protest, claiming that iron ore was not nor ever has been considered a part of the charge in the manufacturing of steel by any steel company in America. Nevertheless, recently your department has been deducting each month from the total amount of the claim submitted the full bounty upon the product of each heat where it was shown that the total weight of the charge for the heat plus the weight of pig iron ore used has been more than double the weight of the pig iron. The company's printed forms show the quantities of the 'materials charged' used in each charge, and the weight of the 'total charge.' In addition to the 'materials charged' there are various other materials used (such as limestone in large quantities) which do not appear in the 'materials charged,' nor are otherwise taken into account, but which, save iron ore, do not contain iron. The department, you state, claims that the iron ore (containing as it does a high percentage of iron, for example, Swedish 64 per cent, and Wabana 51 per cent) is an ingredient within the strict meaning of the Act, while the company claims that the ore is used as a reagent only, for the purpose of removing impurities by oxidation, although some of its metallic contents may find its way into the steel.

I have to acknowledge also your letter of the 21st ultimo, and the memorandum inclosed therewith in which Mr. Plummer, the president of the company, sets out at length the contentions of the company, and this morning Mr. Plummer and Mr. Jones, on behalf of the company, called at this department and further explained their views of the question in issue.

The point turns upon the construction to be placed on the expression 'ingredients' as used in the Act. The department as I understand its position, holds that the word means materials used in the process and furnishing part of the finished product, while Mr. Plummer claims in effect that it means the ingredients of the finished product derived from such materials. Mr. Plummer's definition cannot, in my opinion, be accepted. Applying it to the pig iron itself he will hardly contend, I suppose,

that only so much of it as is contained in the finished product, the steel, is to be counted in his favour; that from its weight are to be deducted the impurities which are removed in the process of manufacture. The expression does not mean all the materials used in a heat, including fluxes, and reagents pure and simple, for I understand from yourself, and from Mr. Plummer also, that if it be given that interpretation the object of the legislation would be defeated, since the pig iron used would probably never amount to 50 per cent of all the ingredients, and the Act must, if possible, be so construed as to give effect to the clear intention of parliament to aid and encourage the steel industry. It cannot mean the ingredients of the finished product, for it would be impracticable to work out the provisions of the Act if this view were adopted, and as a matter of fact pig iron is not itself an ingredient in that sense, and it would seem that the definition adopted by the department must be correct, and that the ingredients intended by the statute are such of the materials only as furnish some portion of the finished product.

If, however, it be true as stated by the company that the iron ore is not used as a source of iron, but solely as a reagent for the removal of impurities, it being as Mr. Plummer states the best and most economical oxidizing agent available, I do not think that the Act necessarily requires that it should be counted as an ingredient merely because incidentally a small portion of the iron it contains sometimes finds its way into the steel.

It may be thought expedient in the interests of the government to obtain a report from an expert in the metallurgy of iron and steel upon the technical aspects of the questions involved.

I am, sir, your obedient servant,

The Deputy Minister, Trade and Commerce. E. L. NEWCOMBE, *D. M. J.*

The Statutory Authority for Payment of Lead Bounties from Consolidated Fund.

AUDIT OFFICE, OTTAWA, Feb. 26, 1904.

SIR,—I beg to acknowledge the receipt of your application of the 24th instant for a cheque of $3,753.67 in favour of Alfred le Garde, manager of the Payne Consd. Mining Co., Limited, being amount of bounty claimed on lead contained in lead-bearing ores delivered at the Canadian Smelting Company's smelter between July 1, 1903, and January 31, 1904. This bounty is claimed under 3 Edward VII., chap. 31. Section 1 of this Act provides that the Governor in Council may authorize the payment of a bounty of 75 cents per 100 pounds on lead contained in lead-bearing ores mined in Canada, &c. I have not received a copy of the Order in Council called for by this section. There is printed on your application form an Order in Council (a copy of which I have not received from the Clerk of the Privy Council) approving of certain regulations governing the payment of the bounty, but this order is made to fulfil the requirements of section 6 and is not sufficient to meet the requirements of section 1.

As there is no vote in the Supply Bill applicable to this bounty claim, I shall be glad if you will point out to me the section of the Act (3 Edward VII., chap 31) which authorizes the payment of the bounty from the Consolidated Fund.

I am, sir, your obedient servant,

J. L. McDOUGALL, *A.G.*

The Acting Deputy Minister, Trade and Commerce Dept.

DEPT. OF TRADE AND COMMERCE, OTTAWA, Feb. 27, 1904.

SIR,—I have the honour to acknowledge the receipt of your letter of February 26, and I have made a requisition upon the Clerk of the Privy Council to furnish you with

an official copy of the Order in Council with reference to the Act for the payment of bounties on lead contained in lead-bearing ores mined in Canada.

I note the difficulties you mention with reference to the payment of this bounty, and I may say that I had anticipated them. I shall have to advise you further with reference to the subject.

I am, sir, your obedient servant,

The Auditor General. F. C. T. O'HARA, *Actg. D. M.*

AUDIT OFFICE, OTTAWA, March 14, 1904.

SIR,—I beg to acknowledge the receipt of your letter of the 8th instant inclosing a copy of an Order in Council of March 4, 1904, directing that the payment of lead bounties be made from the Consolidated Fund of Canada, under the direction and control of the Minister of Trade and Commerce.

I should like, before dealing further with your applications for these bounties, to have the opinion of the Department of Justice as to the sufficiency of the statute (3 Edward VII., chap. 31) to authorize the payment of the claims in question from the Consolidated Fund.

If the authority is not in the Act itself, the Governor in Council evidently cannot supply the omission.

I am, sir, your obedient servant,

The Acting Deputy Minister, Trade and Commerce. J. L. McDOUGALL, *A.G.*

OTTAWA, March 19, 1904.

SIR,—I have the honour to acknowledge receipt of your letter of the 15th instant —8494—in which you ask for an opinion upon a point raised by the Auditor General with regard to payment of lead bounties under the Act (3 Edward VII., chap. 31).

The Act does not expressly provide that such bounties may be paid out of the Consolidated Revenue Fund, and the Auditor General, before dealing further with applications from your department for payment of bounty, would like to have the opinion of this department as to whether there is sufficient authority for such payment. He expresses the opinion that if the statute is not sufficient the Order in Council of March 4 cannot supply the defect.

In this opinion I think the Auditor is right. The authority must be found in the Act in order to warrant payment out of unappropriated moneys.

I am of opinion, however, that it is not essential that an Act should expressly provide for such payment, although it is no doubt desirable that express language should be used in order that the attention of Parliament may be specially directed to that feature. It is, in my opinion, sufficient in law if an intention clearly appears that payments should be so made, and I think that such an intention is shown by the Act in question. The Act contemplates payment so soon as the Governor in Council shall have taken action, and as claims are put in and established in the present fiscal year as well as in years to come, and yet no appropriation is taken. The only way in which the provisions of the Act can be carried out is by payment out of the Consolidated Fund, and I am of opinion that such payment is sufficiently authorized.

I am, sir, your obedient servant,

E. L. NEWCOMBE, *D.M.J.*

The Acting Deputy Minister, Trade and Commerce.

AUDIT OFFICE, OTTAWA, March 23, 1904.

SIR,—I beg to acknowledge the receipt of your letter of the 22nd instant inclosing a letter from the Deputy Minister of Justice, in which he gives it as his opinion that the Act of parliament (3 Edward VII., chap. 31) is, notwithstanding the omission of express authority to charge the bounties directed to be paid on the Consolidated Revenue Fund, sufficient authority for that purpose inasmuch as the intention to do so is shown by the Act.

In view of this opinion, I feel I shall be justified in passing your applications for the bounties in question; but before doing so, I shall be obliged if you will let me know where I shall find the London quotations of the price of pig lead which are copied into the vouchers you have sent me.

I return the copy of Mr. Newcombe's letter that you may have it certified.

I am, sir, your obedient servant,

The Acting Deputy Minister, Trade and Commerce. J. L. McDOUGALL, *A.G.*

DEPT. TRADE AND COMMERCE, OTTAWA, March 24, 1904.

SIR,—With reference to your request for information as to where you could find 'the London quotations of the price of pig lead,' I have to state that I do not know of any place in Ottawa where they are received—in fact, can state almost positively that one cannot obtain them in Ottawa. These quotations are received by wire at the various offices and smelters in the west, to which our officer has access and watches from day to day.

I am, sir, your obedient servant,

The Auditor General. F. C. T. O'HARA, *Actg. D. M.*

AUDIT OFFICE, OTTAWA, March 28, 1904.

SIR,—I have the honour to acknowledge the receipt of your letter of the 24th inst. with reference to the lead bounties, for payment of which you have made application, in which you say that the London quotations of the price of pig lead given by the managers of the various mines claiming payment of the bounties in question cannot be obtained in Ottawa. These quotations, you say, are received by wire at the various offices and smelters in the west to which the officer of the department has access and watches from day to day, but your officer does not give any certificate to that effect so far as these prices are concerned. He certifies to the quantity of ore delivered at the smelter and the quantity of lead contained therein.

It seems to me the Act of parliament calls for further certificate in regard to the price of pig lead in London during the period covered by the claim. This certificate is the more necessary in view of what you say about the difficulty of obtaining the London prices at Ottawa, so that the quotations given in the various claims cannot be tested in this office as the payments are made.

The departmental inspector should therefore certify specifically that the London quotations are correct, and a certificate on behalf of the minister, as called for by section 1 of 3 Edward VII., chap. 31, should also be given, to the effect that he is satisfied that the standard price of pig lead in London, England, does not exceed the amount given in the statute, viz., £12 10s. per ton of 2,240 lbs. Will you please instruct your inspector to amend his certificate in this respect on future claims and with regard to those now in send me a certificate on behalf of the minister sufficient to cover the requirement of the statute.

I am, sir, your obedient servant,

The Acting Deputy Minister, Trade and Commerce. J. L. McDOUGALL, *A.G.*

Bounty to be paid on Lead contained in, not in Lead extracted.

AUDIT OFFICE, OTTAWA, Aug. 31, 1904.

SIR,—I beg to acknowledge the receipt of several applications for payment of the second moiety (40 per cent) of bounty on lead contained in lead-bearing ores delivered and smelted at a smelter in Canada within the fiscal year 1903-4. Before passing these applications I desire to call your attention to the fact that the bounty has been asked on the lead contained in the ore as ascertained by assay, not as shown by the actual amount of lead extracted from the ore by the smelting process. Though the wording of the Act authorizing the bounty seems to justify the interpretation that payment may be claimed on the assay, still I feel obliged to call your attention to the matter, as Parliament, it seems to me, likely intended to pay the obunty not on lead that would remain in the ore and be thrown aside as useless, but on the lead extracted and used for commercial purposes.

In this respect I should like to be informed by whom the various assayers are appointed and to whom they are responsible for the proper discharge of their duties.

What is meant by smelter returns as these words appear in section 2 of chap. 31 of the Acts of 1903 ?

I am, sir, your obedient servant,

The Deputy Minister, Trade and Commerce. J. L. McDOUGALL, *A.G.*

DEPT. TRADE AND COMMERCE, OTTAWA, Sept. 1, 1904.

SIR,—I have the honour to acknowledge the receipt of your letter of August 31 with reference to certain applications for payment of the second moiety, 40 per cent, of bounty on lead contained in lead-bearing ores.

From my casual knowledge of the subject, it would appear that there is justification for the points you raise, inasmuch as bounty has been asked on the lead contained in the ore as ascertained by assay, not as shown by the actual amount of lead extracted from the ore by the smelting process.

As there is no one in the office at present who has practical knowledge of the smelting process I shall be obliged to communicate with Mr. Buchanan at Kaslo, B.C.

I am reliably informed that the assayers are appointed by the provincial government, to whom they are responsible for the proper discharge of their duties. However, I shall ask Mr. Buchanan to answer this question definitely.

I am, sir, your obedient servant,

The Auditor General. F. C. T. O'HARA, *Acting Deputy Minister.*

DEPT. OF TRADE AND COMMERCE, OTTAWA, Sept. 6, 1904.

SIR,—With further reference to your letter of August 31, I beg to state that since my reply thereto of September 1, I have been placed in possession of further information with reference to the points you raise.

I note you state that a 'bounty has been asked on the lead contained in the ore as ascertained by assay, not as shown by the actual amount of lead extracted from the ore by the smelting process.' I do not think that the reading of the Act can be interpreted so as to mean the 'actual amount of lead extracted from the ore by the smelting process.'

Three Edward 7, chapter 31, clause 2, states, 'Payment of the said bounty may be made from time to time to the extent of 60 per cent upon *smelter returns* showing that the ore has been delivered for smelting at a smelter in Canada.' 'Smelter returns,' I take it, does not mean actual results derived by the smelting process, but statements from the books of the smelter showing that the ore, &c. It would be absolutely impossible to give certificates of the actual smelting results, in view of the

fact that the ore from fifteen separate mines, for instance, may all be smelted at one and the same time.

The ore is received at the smelter from various quarters, and from each quantity of ore a fair sample is taken. The ore is then thrown into a common heap for smelting purposes. The sample, however, is assayed, and upon that assay all payments are made. The mining trade all over the world recognizes this as the common mode of settlement, and not the actual smelting results, which may vary one way or the other to a trifling amount. The Act, therefore, could not mean that the ore produced from every mine should be smelted separately and payments made on the actual results of each.

I have been informed that the assayers are appointed by the smelter, but must have provincial licenses. They are responsible only to the smelting companies, and the producers everywhere in the west recognize their assay as final and beyond dispute. No trouble as yet has taken place. In some instances producers have their own assayers, and the assay of the producers and the assay of the smelter have not been found to vary to any considerable amount worth questioning.

I am, sir, your obedient servant.

The Auditor General. F. C. T. O'HARA, *Acting Deputy Minister.*

AUDIT OFFICE, OTTAWA, September 8, 1904.

SIR,—I have the honour to acknowledge the receipt of your letter of the 6th inst. with reference to the assay of the lead ore delivered at the various smelters in Canada, and upon which assay the bounty authorized by chap. 31 of 3 Edward VII. has been claimed.

As I explained to you in conversation a short time ago, what I should like to know with reference to this assay is the difference in the quantity of lead in the ore as ascertained by assay and the quantity actually extracted by the smelting process. I presume Mr. Buchanan can obtain this information with very little trouble.

I am, sir, your obedient servant,

The Acting Deputy Minister, Trade and Commerce. J. L. McDOUGALL, *A.G.*

KASLO, B.C., Sept. 8, 1904.

SIR,—I have the honour to acknowledge receipt of your letter of 1st instant, with inclosure of a copy of a letter addressed to the deputy minister by the Auditor General, in which the question is raised of the propriety of basing claims for bounty upon lead upon the contents of the ore as found by assay.

From personal knowledge I can say that this point was fully considered and understood by the ministers and members of parliament who introduced the measure, and the wording of clause 1 of the Act was intended to secure to the producer of the ore payment of bounty upon the total lead contents.

The only evidence that is ever obtained of the actual lead contents of any particular lot or shipment of ore is the finding of the assayer.

There are no lead-bearing ores in British Columbia that go into the smelter stack in a greater proportion than about 400 pounds to the ton of charge. The mixing of the ores is an important and difficult part of the business. Ores are intentionally and necessarily mixed in the bins, the roasting heaps and the stack, so that all trace of identity is lost.

There is in the process of smelting some waste of lead. How much that is the general public never know and the smelter manager never knows, except by a check of sales of pig lead maintained for months or years, and compared with the receipts as shown by the assayer's figures.

Neither would the application of a computed average percentage of waste be equitable. Some ores easily yield their metallic contents, some are refractory, and their treatment involves much waste.

In some cases the smelter manager finds it profitable to sacrifice lead in order to save a larger proportion of the gold-silver or copper contents, or to save fuel—or to save labour.

The lead so consumed cannot be said to be wasted insomuch as it has been made the medium of the recovery of other metals of greater value.

Upon the fare of the returns made by the smelter to the shipper appear the figures of the lead contents as reported by the assayer.

From the quantity of lead thus shown smelters usually make an arbitrary deduction. At our smelters this amounts to 10 per cent, but this regarded in the basis of settlement, as upon the same footing with the deduction of $1 per 100 lbs. made from the London price, constituting with the freight and treatment rate—a portion of the smelters remuneration. No one supposes that the wastage actually amounts to anywhere near 10 per cent.

When it does, the explanation is, that the lead has been consumed in the collection of the valuable contents of non-lead bearing or refractory ores.

In regard to the assayers,—

Under an Act of the province of British Columbia no one is allowed to practice as an assayer, in the province, until certified to be a competent and trustworthy person, by an official board of examiners.

These men have professional reputations upon which their livelihood depends, to sustain.

They are, moreover, held in check by frequent reference of their work to umpire test.

There is no pretension that the science of assaying is exact, and the dry process, which is in use, is less so than the wet or chemical process of extraction.

The dry process is preferred because it is in itself the process of smelting in minature, and because it is presumed that the waste in the assayer's furnace will correspond somewhat closely to that which occurs in smelting. It is common enough to have assays of the same sample differ to the extent of one or two per cent such discrepancy involving no suspicion of carelessness or fraud. But no assayer could continue in practice the results of whose work frequently varied from that of an assayer of recognized standing, by as much as 5 per cent.

The all-sufficient protection of the government in all of our bounty payments hitherto has been the fact that the smelters are the purchasers of the lead, and that their interests are the same as our own, to minimize rather than exaggerate the quantity of lead returned.

The close check maintained as between the mine and the smelter is instanced by a bounty claim that goes forward to-day, in which the North Star mine, one of the largest shippers, is shown to have recovered from two carloads, shipped in March and April last, 983 lbs. additional of lead by the submission of samples to umpire assay.

I am sure that Mr. Galliher will, and I think it is probable that the Hon. Messrs. Fielding and Templeman also will remember that this matter was fully discussed prior to the introduction of the Act, and that the words 'smelter returns' in clause 2 of the Act mean and were meant to mean the total quantity of lead as shown by the assay figures on the smelter's returns, and that this was adopted as the only practicable basis of settlement.

I am, sir, your obedient servant,

G. O. BUCHANAN, *Insp. of Lead Bounties.*

The Acting Deputy Minister, Trade and Commerce.

DEPT. OF TRADE AND COMMERCE, OTTAWA, Sept. 12, 1904...

SIR,—With reference to your letter of September 8, I beg to send you herewith a copy of a communication I have received this morning, in reply to an inquiry from the St. Eugene Consolidated Mining Company with reference to the difference in the quantity of lead in the ore as ascertained by assay and the quantity actually extracted by the smelting process.

I am, sir, your obedient servant,

The Auditor General. F. C. T. O'HARA, *Actg. D. M.*

TORONTO, September 10, 1904.

DEAR SIR,—Replying to your letter of the 9th inst., some smelters as a part of their charge for treatment make an arbitrary deduction of 10 per cent from the lead contents of the ore purchased, paying for only 90 per cent of the same. It is impossible to say what the loss in lead, if any, amounts to; it certainly does not amount to 10 per cent, and where smelted with favourable fluxes there is no loss. For instance, other smelters make no deduction whatever, but pay for 100 per cent of the lead contained in the ore, and adjust their other charges accordingly. So far as we can ascertain, originally there was a loss of about 10 per cent in the old process of smelting lead, so this gave rise to the above deduction, which has been continued by some smelters in their contracts and abandoned by others.

As to the actual loss of lead in smelting, it is impossible for any one to determine. If ores are smelted under unfavourable conditions, there might be a very great loss, while on the other hand where conditions are favourable there may be no loss whatever, but some admit that a greater recovery is made than the assays show. Another point is that there are two kinds of assays—fire assay and wet assay. The fire assay is always stipulated for by the smelters, because it does not show the entire quantity of lead contained in the ore, whereas the wet or acid assay would.

The German smelters, to whom we have sold our export concentrates, claim to recover the whole of the lead, and Vogelstein, to whom we sold the concentrates in respect of which we are making the claim for bounty, pays for 100 per cent of the lead determined by fire assay. But it would make no difference if he did not, the deduction on the lead could only be regarded as part of the charge, and is so regarded by all miners.

To sum up, it may be said where lead ores are smelted alone the losses in lead are very great, exceeding 10 per cent. This, however, is practically never done, being too expensive a method. Where the lead ores are fluxed by other ores, the loss is reduced to a very small one. And lastly, where the lead ores are used simply as a flux mixed in small proportions with other ores, there is more lead recovered than is actually paid for.

Finally, the whole matter is one of rate or charge for treatment, and can only be so regarded. It is for this reason that the Lead Miners' Association stipulated particularly with the Finance Minister that the bounty should be paid upon the 'lead contained in ores,' &c., and not on the lead paid for.

It will be impossible to get the truth from the smelters, because it is their interest to conceal it. The miners claim that there is more lead recovered than paid for, while some smelters admit that they recover the whole, and others declare that they lose a small percentage, owing to their inability to procure suitable fluxing ores, but with that the miners have nothing to do; it is a mere matter of what the charge for treatment comes to, viewed as a whole.

Yours very truly,

THE ST. EUGENE CONSOLIDATED MINING CO., LTD.

The Acting Deputy Minister, Trade and Commerce.

KASLO, B.C., Sept. 12, 1904.

SIR,—With further reference to your letter inclosing that of the Auditor General upon the subject of determination of weight of lead:—

The assayers at the smelters are appointed by the smelter companies.

The principal shippers, such as the St. Eugene and Mr. Alexander's companies, have also assay offices of their own.

All of these hold certificates from the provincial authorities.

Assayers in the United States are generally selected as umpires in cases where a marked difference has appeared; this, not from any lack of confidence in Canadian assayers, but for the elimination of any possibility of favoritism.

I inclose a letter from G. Alexander, Esq., to whom I referred a copy of the letter of the Auditor General.

I have the honour to be, sir, your obedient servant,

(Sgd.) G. O. BUCHANAN,

The Acting Deputy Minister Trade and Commerce. *Inspector of Lead Bounties.*

THE RUTH MINES, LIMITED, Sept. 10, 1904.

DEAR SIR,—I have to acknowledge yours of 8th instant, inclosing copy of the Auditor General's letter of 31st ult. *re* amount of lead contained in the ore.

Throughout the negotiations my understanding was that the bounty was in favour of the producer of the ore and was payable on the lead contained in the ore, the only way of arriving at which is an assay of a correct sample of each parcel of ore. In my opinion the ore producers have a genuine cause of complaint in the fact that this assay (in accordance with the general but unfair practice of the smelters) is determined by the fire method and not the wet method, the latter, which is admittedly the more accurate, giving higher lead results than the former (which is the cheaper and quicker) method.

But in regard to the point as to whether any losses of metal in the smelting process should also be charged against the producer, it would appear to be manifestly unjust that he should be penalized for faulty practice on the part of others after the ore has left his hands. The Huntingdon-Heberlein process, which is now in actual use in the Colorado smelters of the American Smelting and Refining Company, as well as in Germany and Australia, reduces the loss of lead in smelting to practically nil. On the other hand the loss could be brought up to any point by faulty plants or practice. It is suggested that the miner should be made chargeable for these.

To obtain from the smelters an accurate figure as to the actual losses of lead would be so difficult, if not impossible, that it is fortunate the Act makes the bounty payable on lead 'contained in ores mined in Canada,' not on lead recovered by the smelting process from such ores. Had the latter wording been suggested we who represented the mine owners would undoubtedly have pressed for some protection against faulty processes now that lead losses can be practically eliminated by improved methods.

The assayers are appointed by the companies employing them. They have to qualify in an examination by the provincial mining authorities, and their determinations are subject to reference to an umpire mutually agreed upon by buyer and seller.

By 'smelter returns' are understood the documents of account rendered by the buying smelter to the selling mine, the first of which documents in order of delivery is the assayer's certificate of contents of the ore.

Yours faithfully,

G. O. BUCHANAN, Esq., *Inspector of Lead Bounties.* G. ALEXANDER.

AUDIT OFFICE, OTTAWA, Sept. 1, 1904.

SIR,—I beg to acknowledge the receipt of your application of the 30th ultimo for a cheque of $11,338.07 in favour of the St. Eugene Consolidated Mining Company, being bounty claimed on lead contained in lead-bearing ores exported to Europe, and to point out that no certificate has been sent me of the assay of the ore in question.

Please send me the assayer's returns as kept at the mines from which this ore was taken.

I am, sir, your obedient servant,

The Deputy Minister, Trade and Commerce. J. L. McDOUGALL, *A.G.*

DEPARTMENT OF TRADE AND COMMERCE, OTTAWA, Sept. 1, 1904.

SIR,—In reply to your letter of September 1 with reference to the application of the St. Eugene Consolidated Mining Company, I beg to state that our inspector at Kaslo, under date of August 25, writes me as follows:—

'I have checked the assays at the assay office at the mine and at the office of the Canadian Smelting Company, in Trail.'

'The basis of settlement between the parties has been the returns of the assay office of the Canadian Smelting Company.'

'The shipments for export are made from the mine alternately with shipments to the local smelters, and comparison of the returns show practically the same metallic contents.'

I fear some considerable time may elapse before certified copies of those assays could be made. As you will notice, the shipments for export are made from the mine alternately with shipments to the local smelters. I trust, however, that this information will be satisfactory.

I am, sir, your obedient servant,

The Auditor General. F. C. T. O'HARA, *Acting Deputy Minister.*

Subsidy for South African Steamship Service.

AUDIT OFFICE, OTTAWA, Dec. 17, 1903.

SIR,—With reference to your application of the 16th instant for a cheque of $36,500 in favour of Messrs. Furness, Withy & Co., being the claim of the company for steamship service to South Africa under the conditions of a contract dated August 12, 1902, from July to October 31, 1903.

The contract calls for a sailing from a Canadian port within the first seven days of each month during the period of its continuance. You will notice that only one of the three voyages for which payment is asked comes within this condition. Again, there is no evidence of the steamers having called at Quebec, and in only one voyage, that of the 'Wyandotte,' have there been the necessary calls at two additional ports, other than Cape Town, in South Africa.

There was no sailing from a Canadian port in the month of September, 1903.

I am holding your application until I hear from you in explanation of these deficiencies in the performance of the service.

I am, sir, your obedient servant,

The Acting Deputy Minister, Trade and Commerce. J. L. McDOUGALL, *A.G.*

Re **Canada-South African Service.**

DEPT. OF TRADE AND COMMERCE, OTTAWA, January 4, 1904.

SIR,—Referring to your letter of December 17, I have the honour to state that, with reference to the contract calling for a sailing from a Canadian port within the first seven days of each month, the attention of the company was drawn by various bodies, including the Canadian Manufacturers' Association, to the fact that the date for these sailings, that is to say the first of each month, was too early to be suitable for the opening and closing of St. Lawrence navigation, and it was suggested that a date nearer the middle of the month would be desirable. As you may be aware, Sir William Mulock aided in the drawing up of this contract in England; and it was ultimately agreed to by him, when in England, that the 18th of each month should be substituted.

With reference to the steamers calling at Quebec on their Montreal voyages, I inclose you herewith copies of the outward entrance of the steamer 'Wyandotte' from Quebec, June voyage, and the steamer 'Oriana,' August voyage. As for the 'Wyandotte' on her October voyage, the company were unable to procure a single inquiry for space at Quebec; and therefore did not call except to exchange pilots.

With reference to the steamers calling at three ports in South Africa, the necessary certificates are only obtainable from South Africa from two to three months after the sailing of a steamer from this side; and it is well known that despatch in South Africa has been very bad, some of the vessels having been kept from a month to two months before being completely discharged. Hereafter, however, as there has been considerable improvement, this difficulty, it is expected, will be largely overcome. A certificate of the 'Oriana' has just reached me, showing her entrance at and clearance from Port Elizabeth, which she did after leaving Cape Town and *before* arriving at Durban, thus completing the record. I am informed by the company that they have not yet received any reports of the 'Wyandotte's' arrival, as it is just now a little over a month since she arrived at Cape Town. When same is received it will be forwarded you without delay.

I would be glad, therefore, if you can issue the cheque, as this company has been faithfully performing a very difficult service.

I am, sir, your obedient servant,

The Auditor General. F. C. T. O'HARA, *Acting Deputy Minister.*

Re Inspection of Staples.

AUDIT OFFICE OTTAWA, March 25, 1904.

SIR,—The revenue that has come to account from inspection of staples up to February 29 amounts to $23,585.97. This is considerably less than during the same period last year.

The inspectors' returns appertaining thereto have not been furnished. I wrote you in May last in reference to the delay in forwarding these returns. Please have those in arrears sent forward at once, and direct that they shall be forwarded regularly in future. I am, sir, your obedient servant,

The Acting Deputy Minister, Trade and Commerce. J. L. McDOUGALL, *A.G.*

Re Inspection of Staples—Winnipeg.

AUDIT OFFICE, OTTAWA, April 12, 1904.

SIR,—The revenue from inspection of staples consists of fees for inspection, for weighing and for licenses, and proceeds of sale of samples.

The returns furnished are as follows:—

(1.) Statement of cars and cargoes inspected.

(2.) Statement of cars and cargoes weighed.

(3.) Statement of cars and cargoes payments received arranged to show the receipts for inspections, for weighing, for licenses and for samples sold.

As there is no means furnished for making any audit of the inspections and weighing, the statements should be certified as requested in my letter of May 30, 1903.

You state that to your knowledge, there are no receipts issued for the payments received. If there are not, there should be, and the counterfoils should be furnished to this office. Without them there is practically no means of making any audit of this revenue.

The inspectors at Toronto and Montreal should also issue receipts and the counterfoils should be furnished. I am, sir, your obedient servant,

The Act'g Dep'y Minister of Trade and Commerce. J. L. McDOUGALL, *A.G.*

TRADE AND COMMERCE DEPT., OTTAWA, April 15, 1904.

SIR,—Referring to yours of the 12th instant, in *re* returns furnished of inspection of staples at Winnipeg, in which you claim that receipts should be issued for payments received, and that you should be furnished with counterfoils.

In reply I beg to state that this is utterly impracticable. The receipts during the height of the season would amount to several hundreds every day, if they were issued; and it would require the services of three or four extra clerks to do the work at Port Arthur and Fort William. There can be no actual daily correspondence between the amount accrued as fees for inspection and the amount received, as under the terms of the Act, the inspection fees are made advance charges which the railway collects on delivery of the grain at the terminal. It may be days or weeks or even months before the Railway receives the fees which are then deposited. There is an elaborate check at the office of the chief inspector; and if your office is not satisfied, you had better send an agent up there to inspect his office. It would be quite impossible to furnish you with duplicates of the business done, when during the height of the season nearly 100 men are employed in the work.

I am, sir, your obedient servant,

The Auditor General. W. G. PARMELEE, *D.M., T. & C.*

AUDIT OFFICE, OTTAWA, April 25, 1904.

SIR,—I have received your letter of the 15th inst., in reference to the inspection of staples.

You state that it is utterly impracticable to have receipts issued and the counterfoils furnished to this office, owing to the volume of work during the height of the season.

According to the returns, the fees are mostly paid by the Canadian Pacific Railway, the Canadian Northern Railway and six or seven companies. The total receipts in 1902-03 amounted to $80,683.19. The receipts in the September quarter of 1903 amounted to $25,143.30, and presumably no other quarter will exceed this amount. This $25,143.30 is made up of 107 payments. The work of issuing 107 receipts in three months should not greatly inconvenience the staff. The payments being made weeks and sometimes even months after the inspections, would seem an additional reason why the payees should be given a receipt. At present there is no means furnished to this office to make more than a clerical audit.

You state that there is an elaborate check at the office of the chief inspector. Have you had the inspectors' books examined by an officer of your department? If not, what means have you of verifying the returns furnished? You have not referred to my request that the statements of cars and cargoes inspected and weighed should be certified. You stated in your letter of May 23, 1903, that the returns furnished to this office referred to the receipts only and not to the inspections. In this you were mistaken. The returns furnished cover the inspections made as well as the payments received. The returns of the inspections made should be certified by the inspector to the effect that they contain a statement of all the grain inspected during the period.

I have to ask your further consideration of this subject.

I am, sir, your obedient servant,

The Deputy Minister of Trade and Commerce. J. L. McDOUGALL, *A.G.*

TRADE AND COMMERCE DEPT., OTTAWA, April 26, 1904.

SIR,—I have yours of the 25th in reply to mine of the 15th in reference to your requirements *re* returns of inspection of staples.

As we do not seem to exactly understand each other I think the best way would be to allow the matter to stand for the present as I expect Mr. Horn, Chief Inspector, will be here before very long in connection with the new Inspection Bill which will be going through this session, and then you can have such conversation with him and get such information as will satisfy you on the subject.

I am, sir, your obedient servant,

The Auditor General. W. G. PARMELEE, *D. M. T. & C.*

AUDIT OFFICE, OTTAWA, September 16,1904.

SIR,—I have to call your attention to the large reduction in the fees for inspections, weighing, &c., that accrued at Winnipeg during 1903-04 as compared with 1902-03, as shown by the following statement :—

	1902-03.	1903-04.
Fees for inspections	$44,762 66	$31,209 90
" weighing	25,401 30	18,250 70
" licenses	1,860 00	2,208 00
Samples sold	1,231 78	1,175 14
	$73,255 74	$52,843 74

I have no means of determining that all the grain, that should be inspected and weighed, has been. The returns are not even certified to that effect, though I have asked that they should be. I shall be glad to hear from you in reference thereto.

I am, sir, your obedient servant,

The Deputy Minister, Trade and Commerce. J. L. McDOUGALL, *A.G.*

TRADE AND COMMERCE DEPT., OTTAWA, September 23, 1904.

SIR,—Referring to yours of the 16th in which you call attention to a material falling off in the fees collected in the Manitoba inspection division on grain inspected,

weighed, &c., during the year 1903-04, as compared with the year 1902-03, and asking for an explanation :—

The explanation is very easy to give, and is simply this—there was not as much grain raised, exported or inspected during the year 1903-04 as during the year 1902-03: and I may mention another circumstance that largely affected the fees last year and which will more so in the future ; that is the fact that railways are now constructing larger cars, that is to say large numbers, in fact all the newly constructed grain cars are made to contain nominally one thousand bushels, in reality they hold from twelve to thirteen hundred bushels in place of the old cars not to exceed six hundred bushels of some years ago, while the fee for inspecting a car is the same whether it contains five hundred or thirteen hundred bushels, so that a given quantity of grain is shipped in fewer cars, and consequently less fees are collected.

I am, sir, your obedient servant,

The Auditor General. W. G. PARMELEE, *D. M. T. & C.*

AUDIT OFFICE, OTTAWA, September 17, 1904.

SIR,—According to the returns of the inspector at Winnipeg, the fees accrued during the year ended June 30 last, for inspections, weighing and licenses, together with the proceeds of sales of samples, amounted to $52,843.74.

The deposits that have come to account to date only amount to $50,453.41.

I have to ask for a statement of the companies in arrears, and the reason why they are so. I am, sir, your obedient servant,

The Deputy Minister of Trade and Commerce. J. L. McDOUGALL, *A.G.*

TRADE AND COMMERCE DEPT., OTTAWA, January 20, 1905.

SIR,—Accordlng to your letter of September 17, 1904, a copy of which has been duly received, the amount remaining unpaid on account of fees for 1903-04 for the Manitoba Grain Inspection Division was $2,390.33.

Since then there has been received and transmitted to Receiver General, the sum of $382.85, which leaves $2,007.48, to which must be added $313.69, the difference between the total fees accrued as given by your letter and that shown by statement hereon.

There is, therefore, still due by the Canadian Northern Railway $2,321.17.

A letter has already been written to the Chief Inspector at Winnipeg inquiring about balance due. I am, sir, your obedient servant,

The Auditor General. F. C. T. O'HARA, *Actg. D.M.*

Re **Inspection of Staples—Toronto.**

AUDIT OFFICE, OTTAWA, April 9, 1904.

SIR,—I have recently received the returns of the grain inspector at Toronto for the six mnths ended December 31, 1903.

There is a return made for each week, and in addition, a special return for the month containing entries not in the weekly returns. Please explain the reason.

The returns for July, August and September amount to $452.50. No deposit in acquittance was made till October 3. On that date six separate deposits were made covering the revenue accrued in July.

Similarly on November 4, five separate deposits were made for the August revenue, and this procedure continues till March 2, when the last deposit for December was made.

If the fees are not paid as they accrue, then a statement should be furnished showing the actual receipts each day. The treasury regulations require that a deposit shall be made daily if $25 is on hand. This regulation should be strictly observed.

Why is it necessary to make five or six separate deposits on the same day?

On January 7, $15.60 was deposited, and on the 29th, $6.20, for fees for inspection of hay. No returns have been furnished.

In my letter of May 20 last, I suggested that the returns should be certified by the inspector to the effect that they contain a statement of all the grain inspected during the period. No such certificate has been added to the returns.

I am, sir, your obedient servant,

The Act'g Dept'y Minister of Trade and Commerce. J. L. McDOUGALL, *A.G.*

TRADE AND COMMERCE DEPT., OTTAWA, April 12, 1904.

SIR,—I have your letter of April 9, *re* inspection of staples at Toronto agency. I may say that we have had endless trouble with this office; and Mr. Craig, the chief inspector for Montreal, is there now with a new man, who is to be the office assistant of the inspector at Toronto, and it is to be hoped that the books will be placed in better shape than they have been heretofore. I have instructed Mr. Craig to see that the deposits of the Toronto office are made promptly and the proper returns furnished of fees accrued, &c. I hope in a short time to have the difficulties removed.

I am, sir, your obedient servant,

The Auditor General. F. C. T. O'HARA, *Act. D.M. of T. & C.*

AUDIT OFFICE, OTTAWA, September 17, 1904.

SIR,—You intimated in your letter of April 12 that you had taken steps to have the work at the Toronto inspector's office done more satisfactorily.

The returns for May and June amount to $256.70 and $6.40 for inspection of hay. Usually there is a weekly return, and a special monthly return. There is no special return for May or June.

The deposits that have come to account in acquittance only amount to $207.15.

It is desirable that a satisfactory settlement should be made of the accounts appertaining to 1903-04, and the balance of the fees deposited, as the books for that year will soon be closed. I am, sir, your obedient servant,

The Deputy Minister of Trade and Commerce. J. L. McDOUGALL, *A.G.*

TRADE AND COMMERCE, OTTAWA, September 20, 1904.

SIR,—Referring to yours of the 17th in *re* inspection of staples at Toronto :—

I beg to state that as regards the special monthly returns they would, in the case of Toronto, refer to cargoes of which none were inspected, therefore there would be no returns.

That the deposits have not been equal to the amounts accrued—this of course occurs in every month, as it is frequently some time after inspection before the amounts can be collected. Any balances that are not collected during the year will necessarily be carried forward to another year. The balance outstanding will be small, but I presume it will be impossible to get it all in before you close your books.

I am, sir, your obedient servant,

The Auditor General. W. G. PARMELEE, *D. M. T. & C.*

Re **Inspection of Staples—Montreal.**

AUDIT OFFICE, OTTAWA, April 13, 1904.

SIR,—The deposits by the Inspector at Montreal are seemingly made weekly, a couple of days after the conclusion of the week.

Sometimes the deposit is for the exact amount of the return; at other times more.

The total amount of the returns for the six months ended December 31, was $3,586.65; the total amount of the deposits was $3,645.30.

Possibly there was some other commodity inspected, hay, for instance, for which no returns have been furnished.

I have to ask for an adjustment between the returns and the deposits.

I am, sir, your obedient servant,

The Acting Deputy Minister, Trade and Commerce. J. L. McDOUGALL, *A.G.*

TRADE AND COMMERCE DEPT., OTTAWA, April 15, 1904.

SIR,—In reply to yours of the 13th instant, I beg to state that there can be no exact correspondence of amounts deposited and returns made of inspection. Inspection fees are, under the Act, made advance charges, and the railways only collect on delivery at terminals or shipments away from Montreal, so that there may be short deposits for any given period, or there may be over deposit for that period.

The total amount is only adjusted annually, and then perhaps not for weeks after the close of the year.

There is at certain seasons of the year some hay inspected at Montreal; but there would not be in the winter season. It is only when shipments are going forward direct from the port.

For the reasons above given, I see no means of an actual adjustment between fees and deposit of any given date. All we have to look to is to see that eventually the full amount accrued is accounted for.

I am, sir, your obedient servant,

The Auditor General. W. G. PARMELEE, *D. M. T. & C.*

AUDIT OFFICE, OTTAWA, September 16, 1904.

SIR,—The returns of the inspector at Montreal show that fees accrued during 1903-04, amounting to $4,557.40. Deposits were made amounting to $4,564.80, an excess of $7.40.

Evidently the deposits cover more than is contained in the returns. The returns for the weeks ended July 4, 11 and 25 were covered by deposits for the same amount. The return for July 18 was $210, the deposit on July 22 was $260.40. There are also other differences between return and deposit. Possibly fees were collected for inspection of hay, fish, &c. If so, returns should be furnished.

You stated in your letter of April 15 that an adjustment is made annually after the close of the year. When you have the adjustment made please send me a copy.

I am, sir, your obedient servant,

The Deputy Minister of Trade and Commerce. J. L. McDOUGALL, *A.G.*

TRADE AND COMMERCE DEPT., OTTAWA, September 19, 1904.

SIR,—Replying to yours of the 16th in *re* inspection fees at Montreal, in explanation I beg to submit the following figures:—

Total deposits for the year 1903-04	$4,564 80
Which included for samples sold	41 80
Net deposits on account of inspection fees	$4,523 00
From which deduct the amount outstanding on July 1, 1903, and collected and deposited after that date	101 20
	$4,421 80
To which add amount outstanding on July 1, 1904, to be collected in 1904-05	135 60
Which makes total inspection fees accrued in the year 1903-04	$4,557 40

You will note these are the same figures as you have.

I am, sir, your obedient servant,

The Auditor General. W. G. PARMELEE, *D.M., T. & C.*
